

General Notes

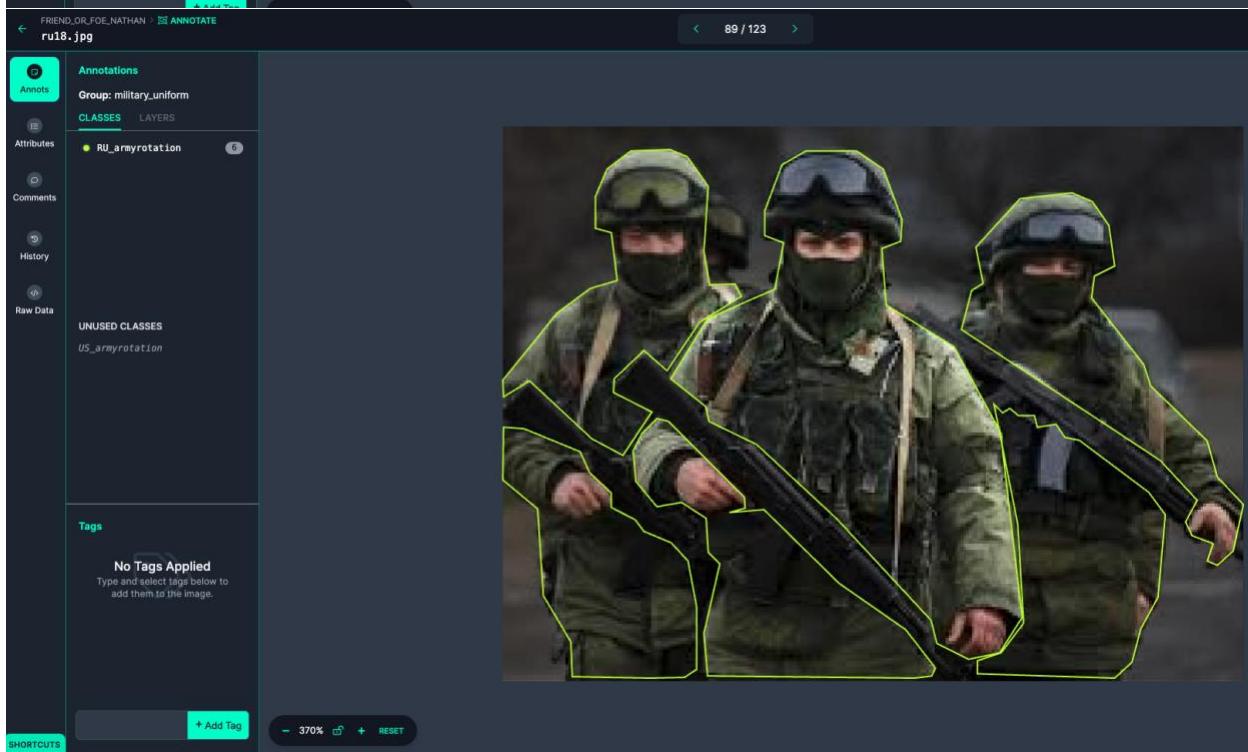

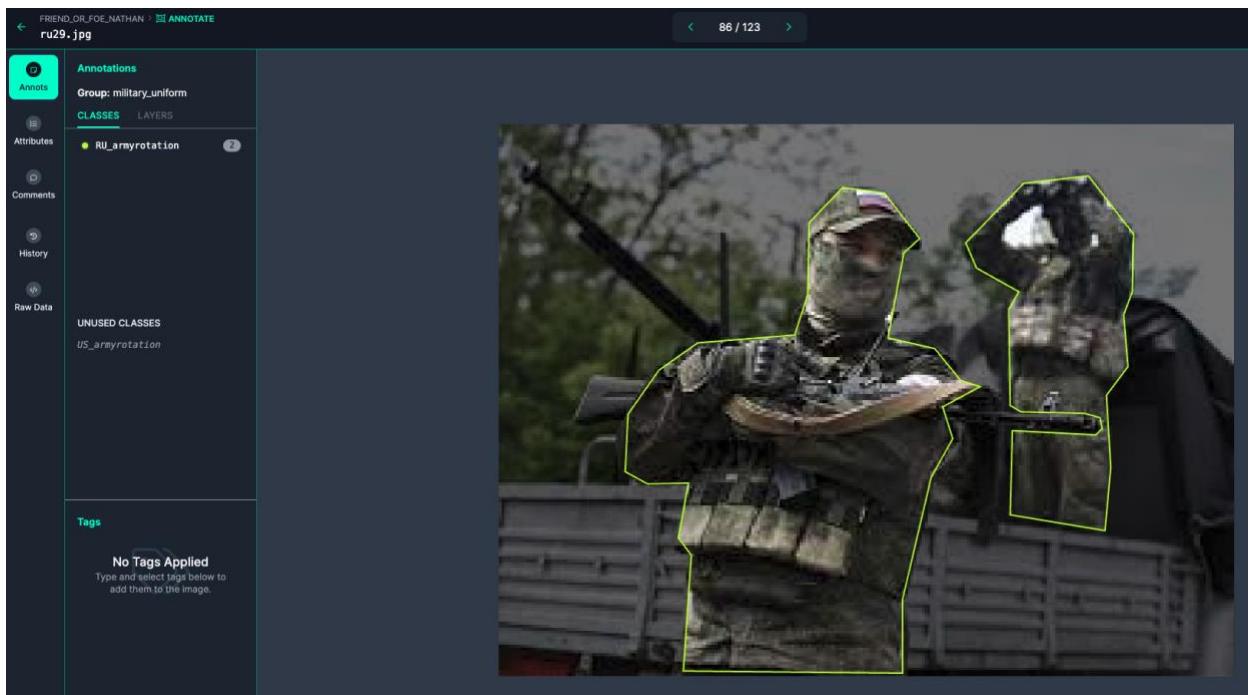

- 123/125 Russian Army, 27/25 Null, 125/125 US Army
- A significant number of blurry pictures may have a negative impact on the model's accuracy.
- US Air Force, **army**, and Space Force all share the same uniform, so the model will probably have a hard time distinguishing the difference. Nothing to do about it, just noting it for the report.
- Lots of overlap with the other Russian military datasets. <Not an issue>

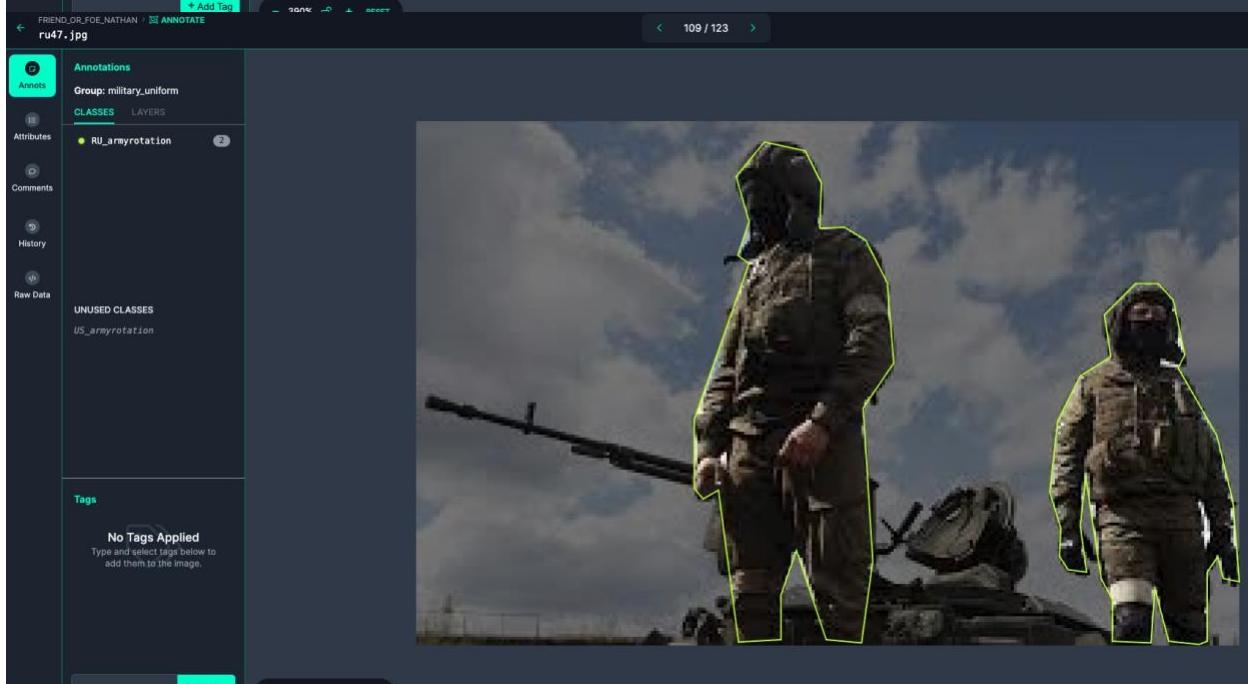

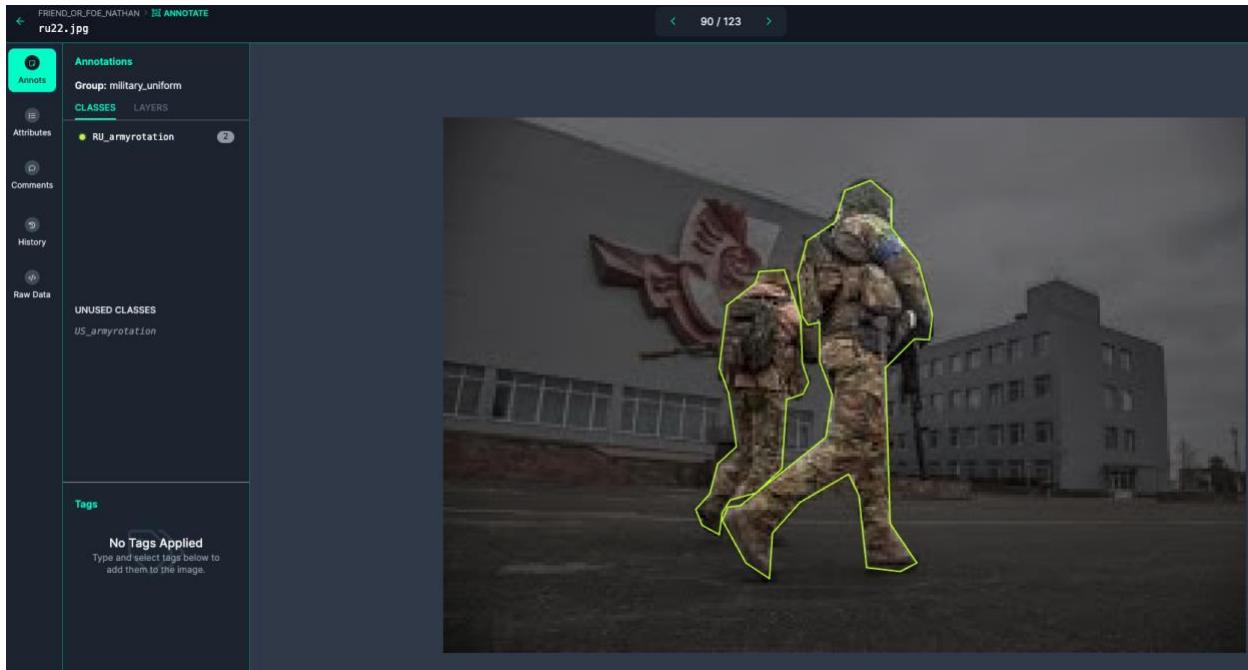

Too blurry to tell

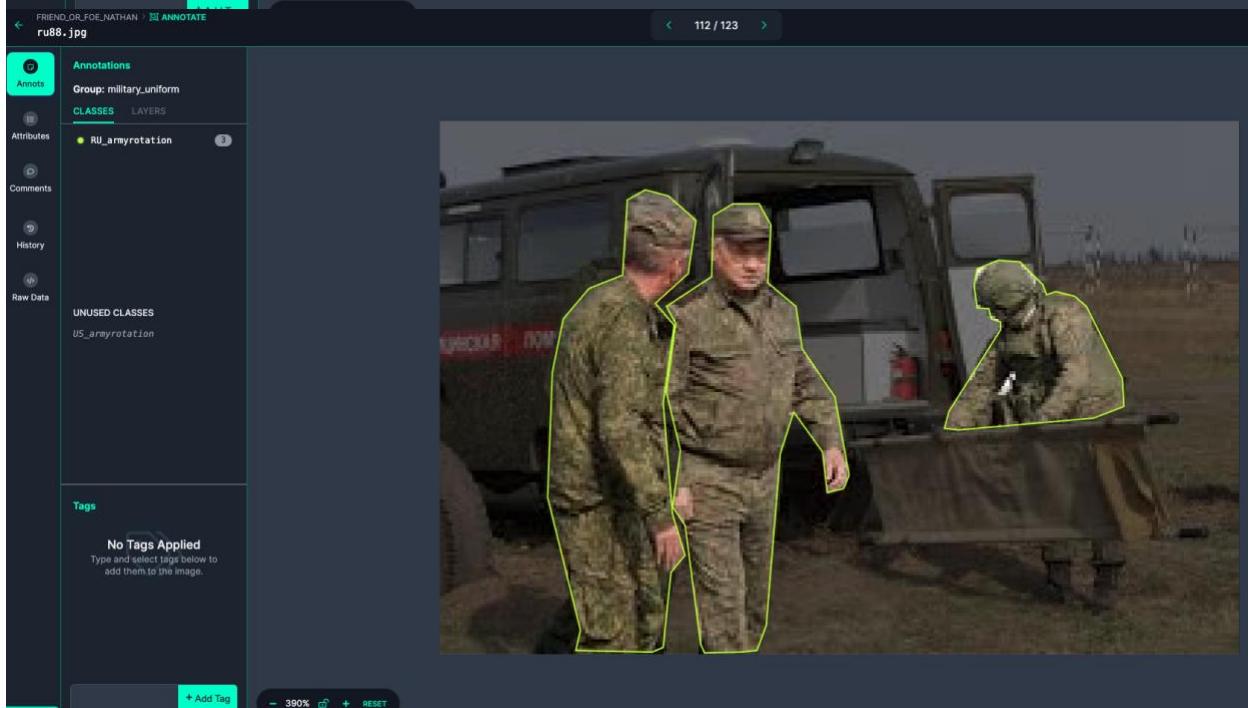

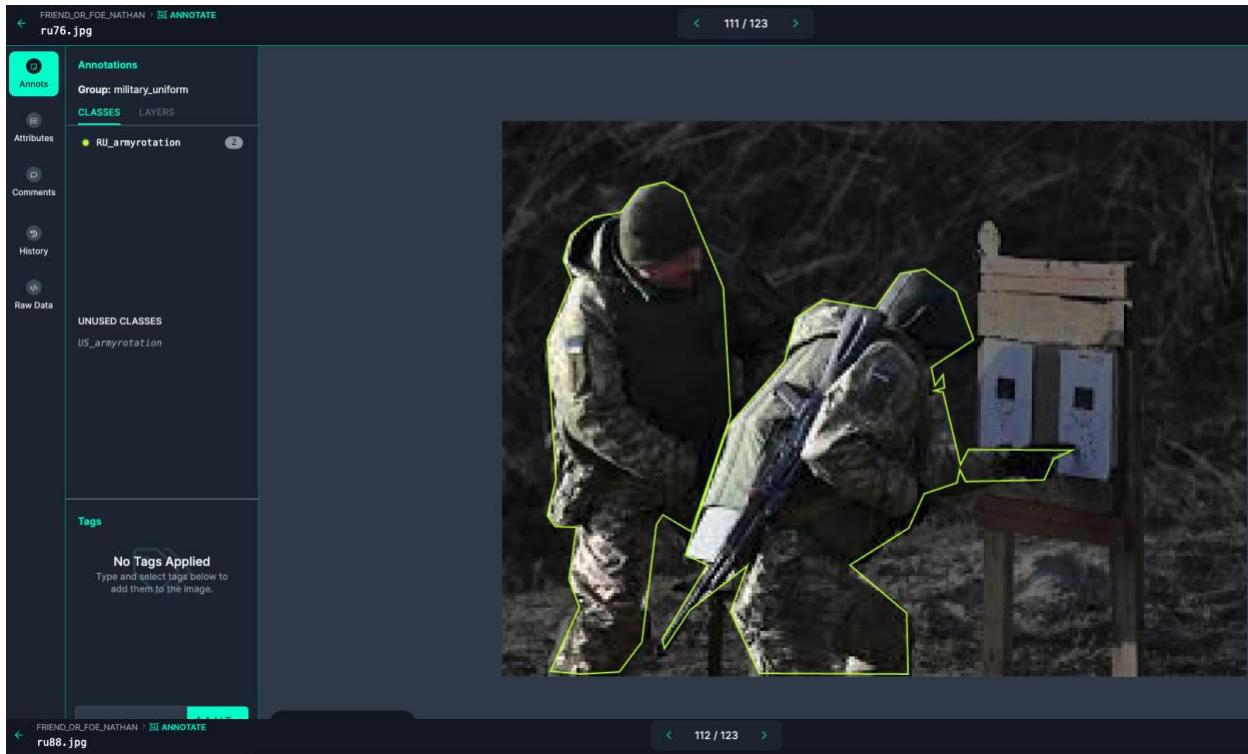

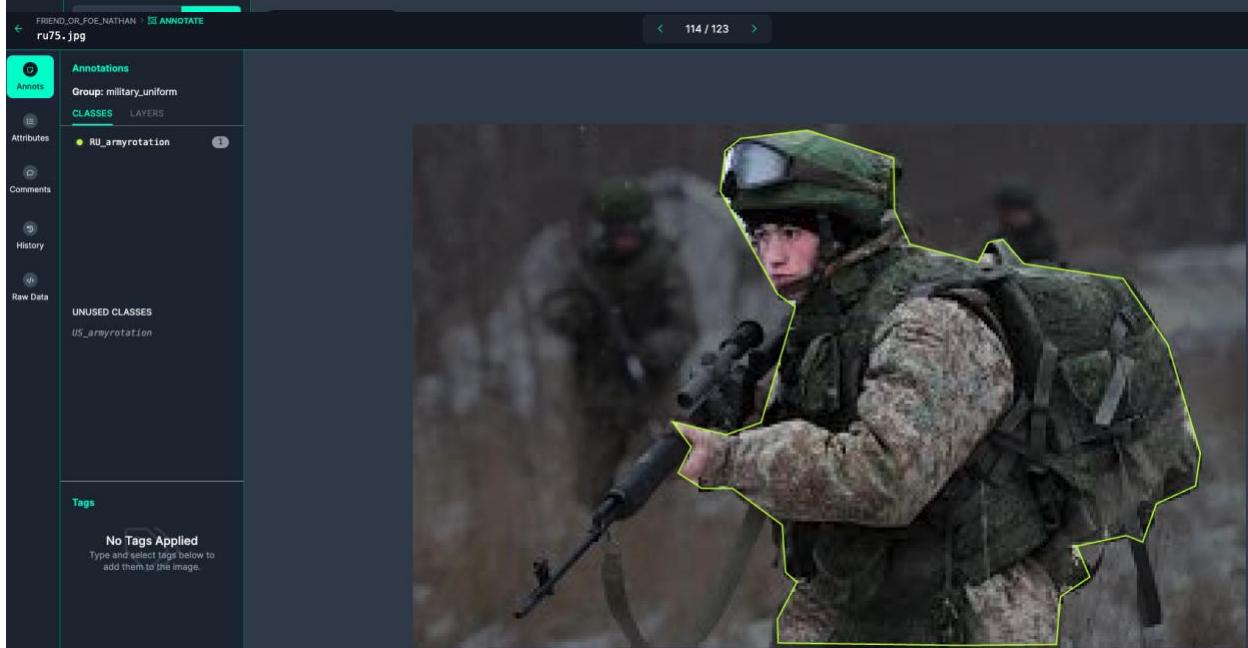

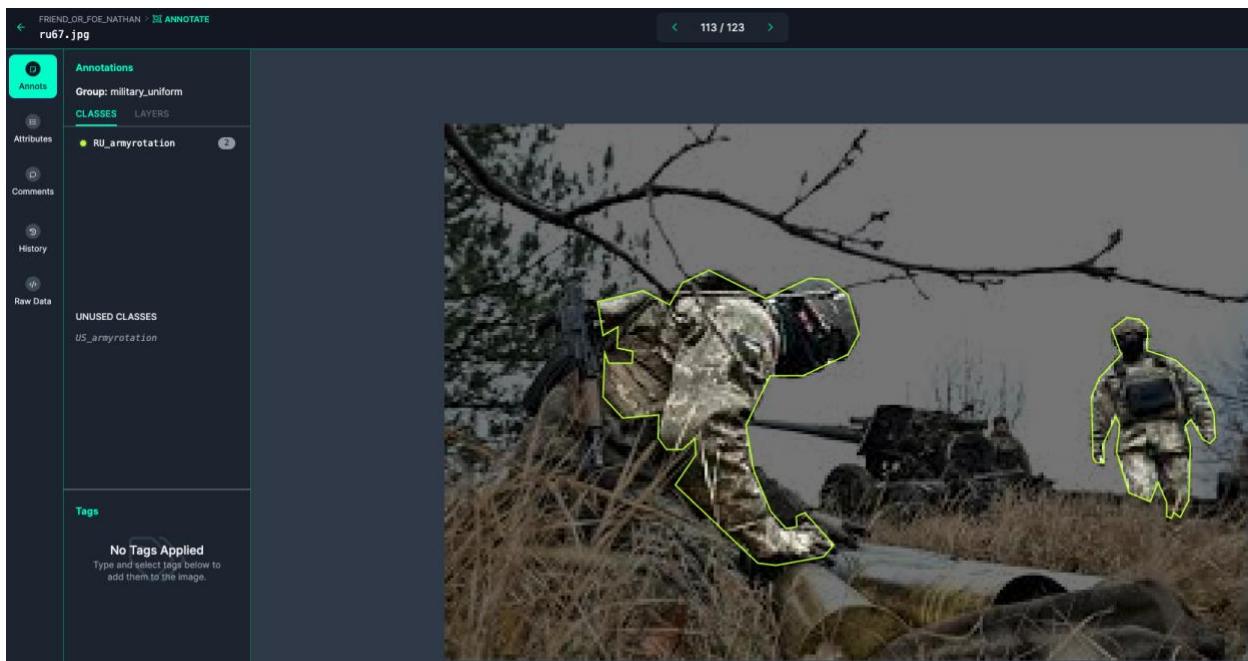

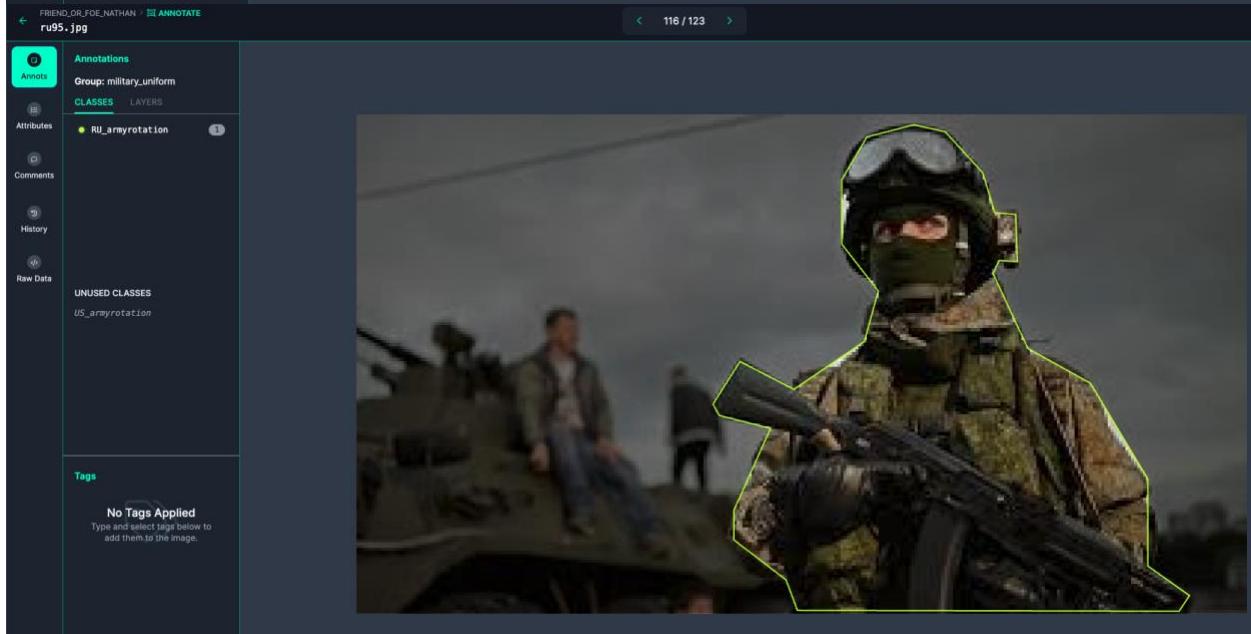

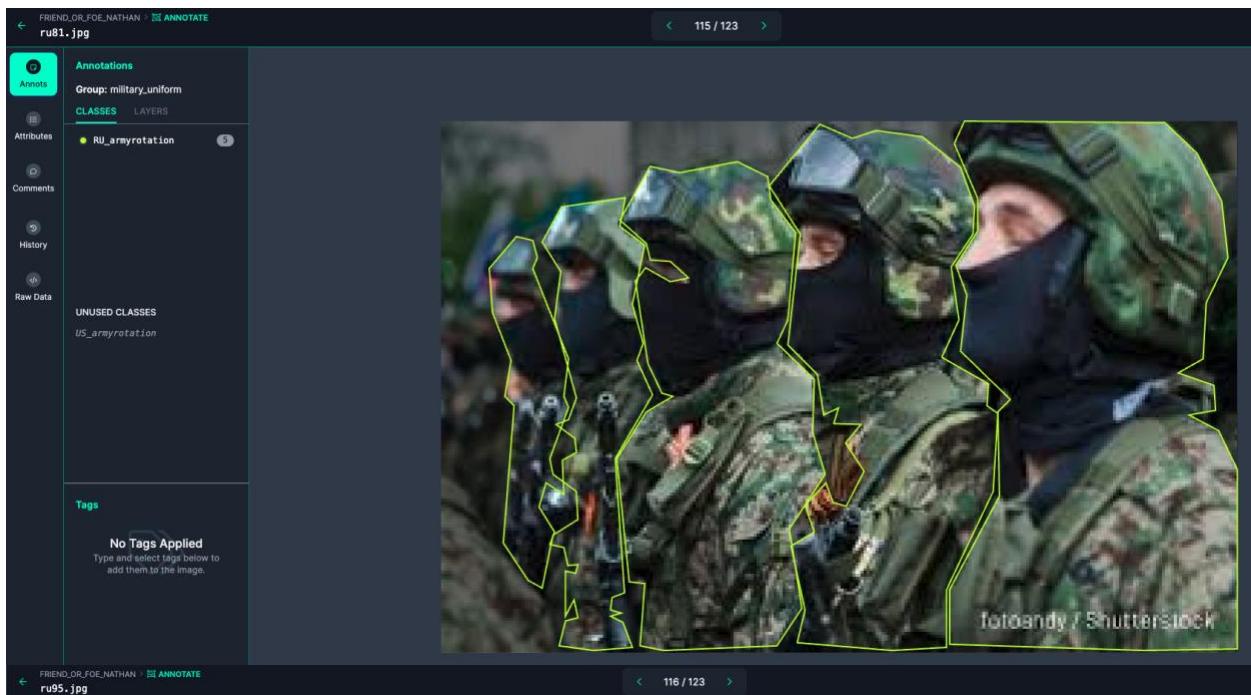

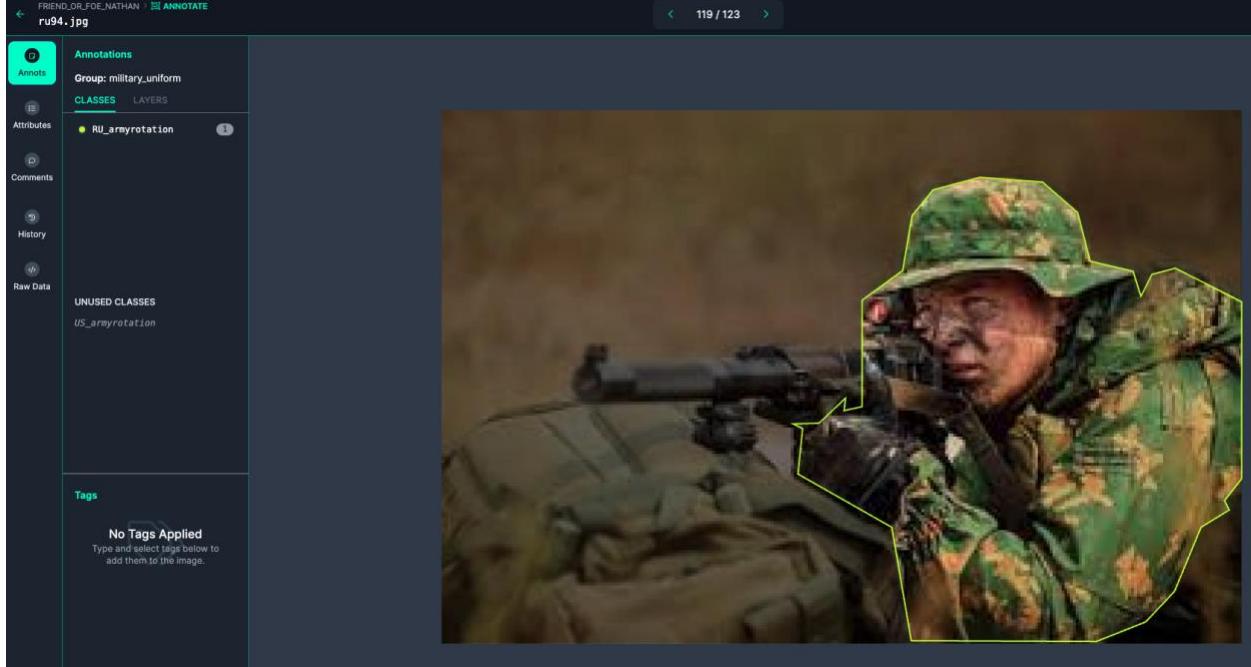

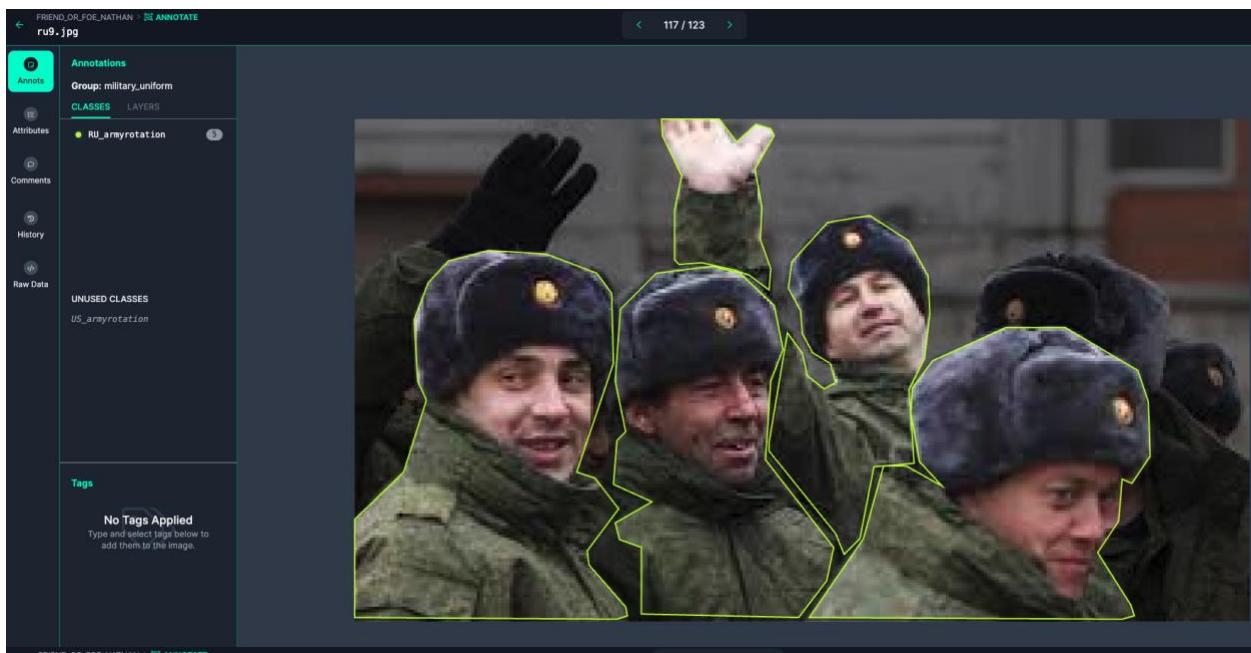

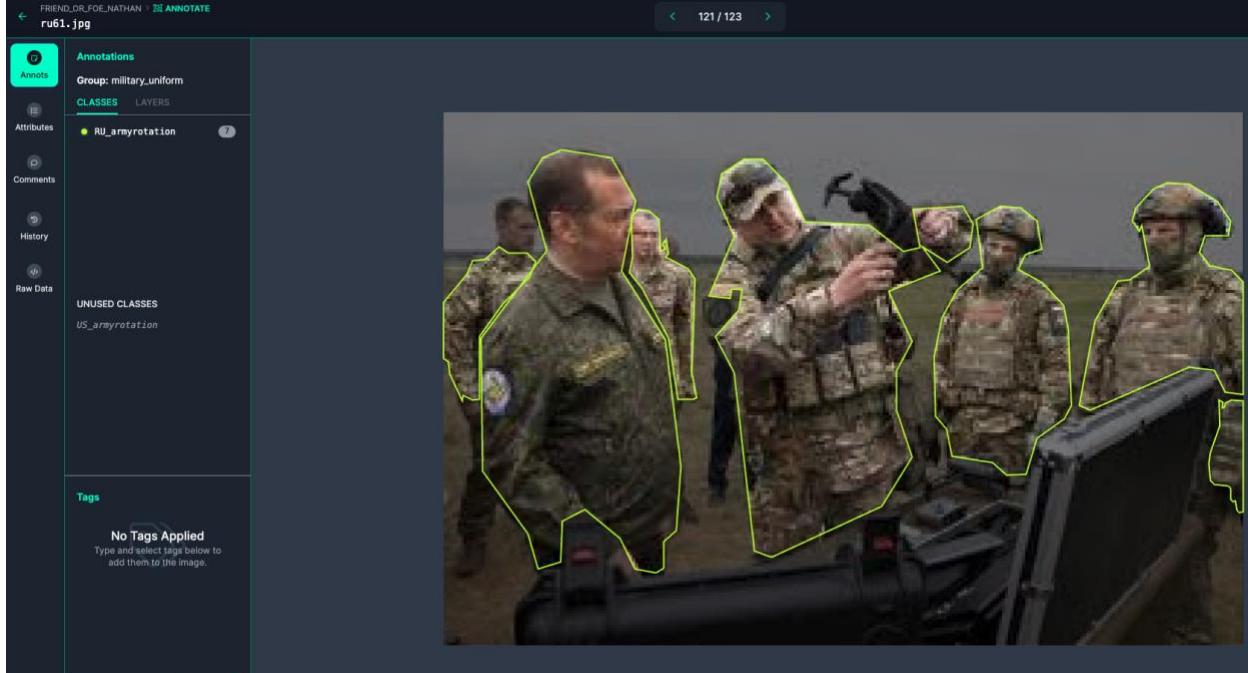

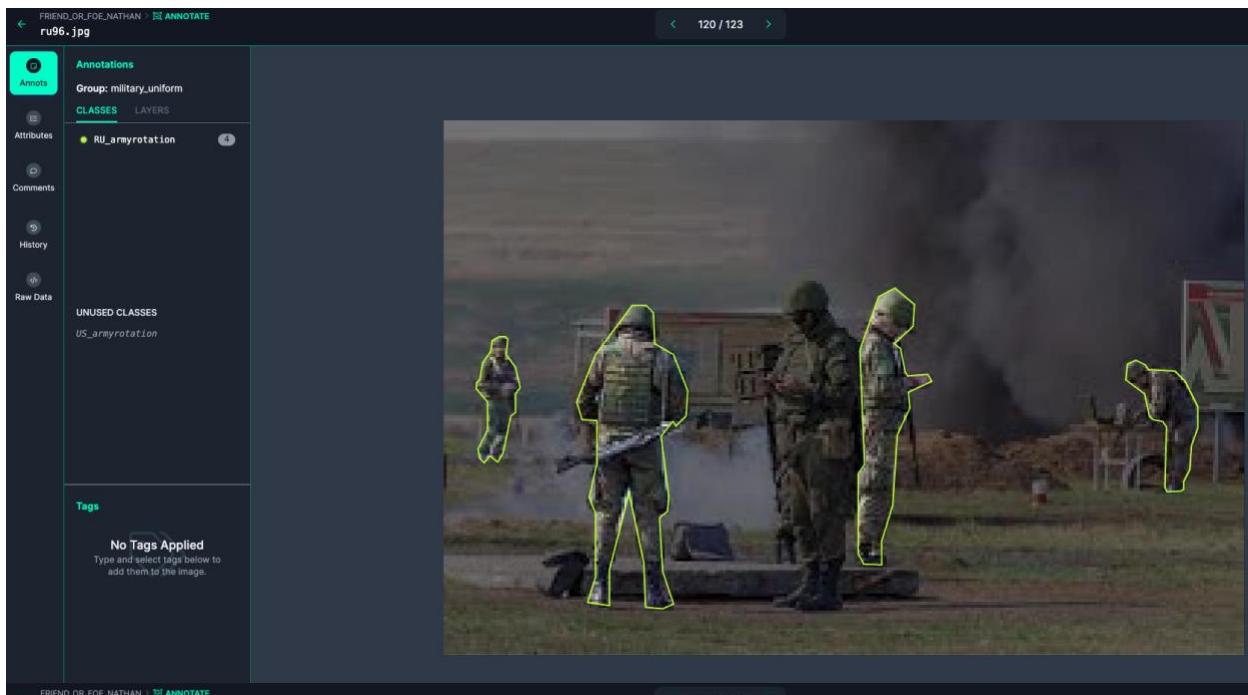

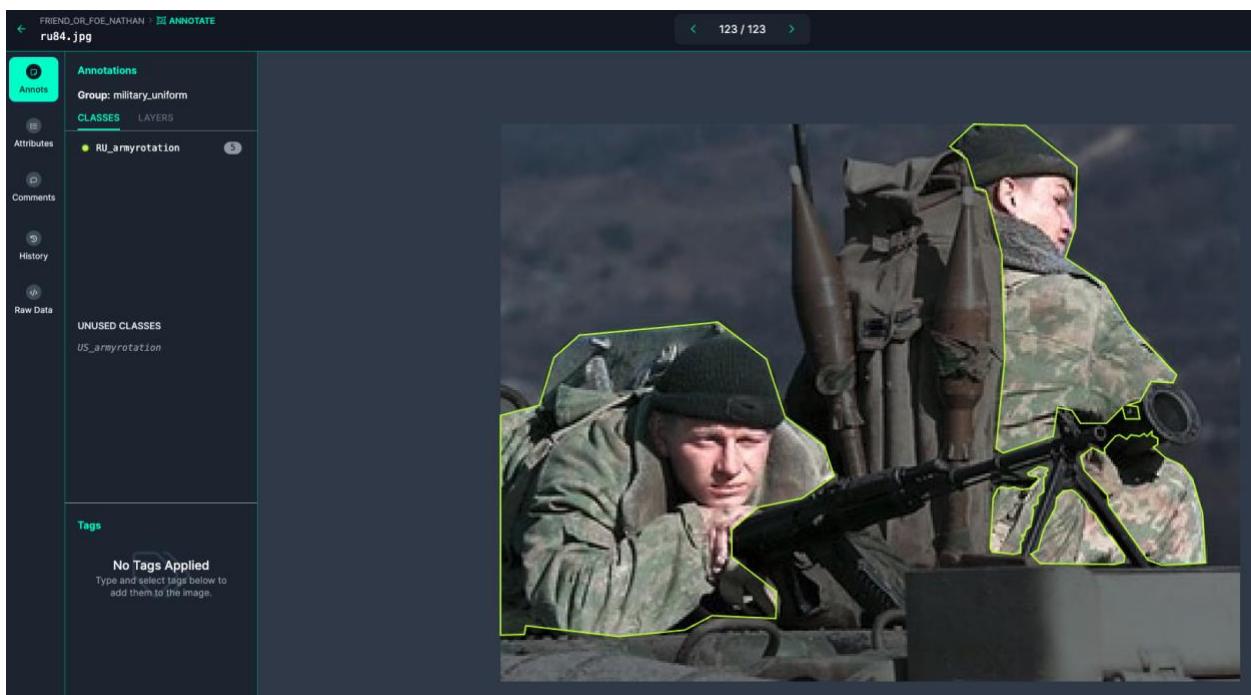

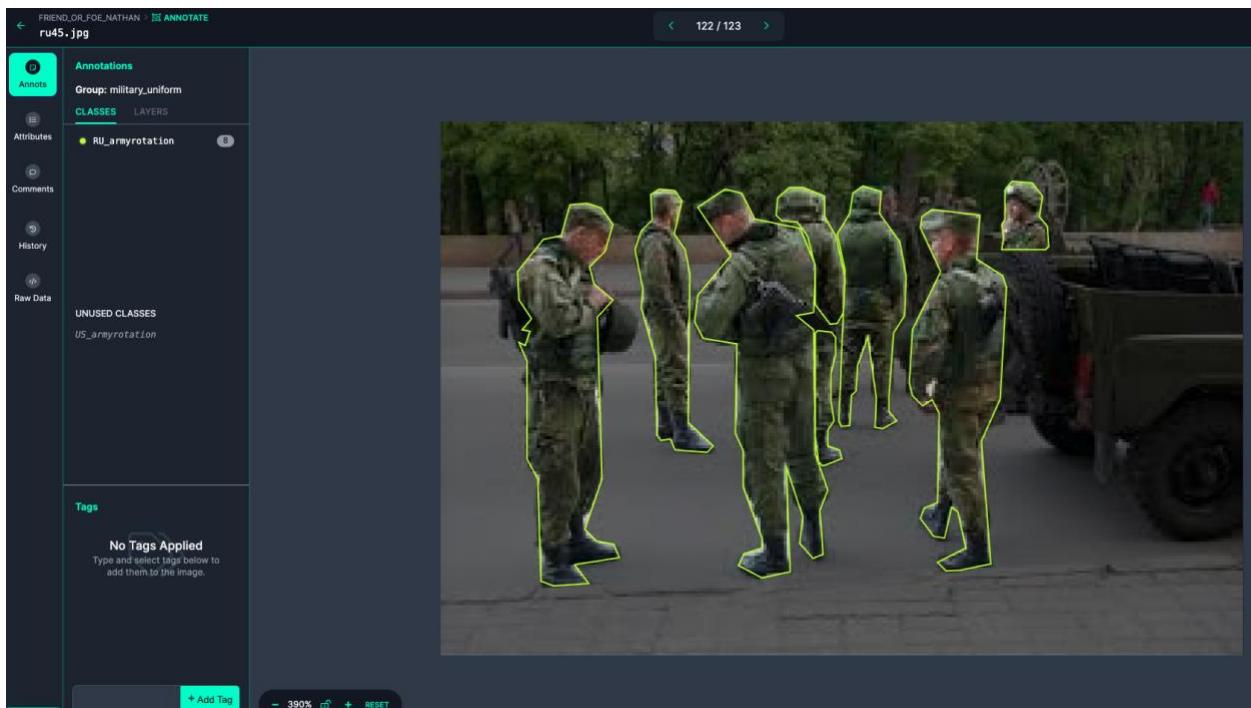

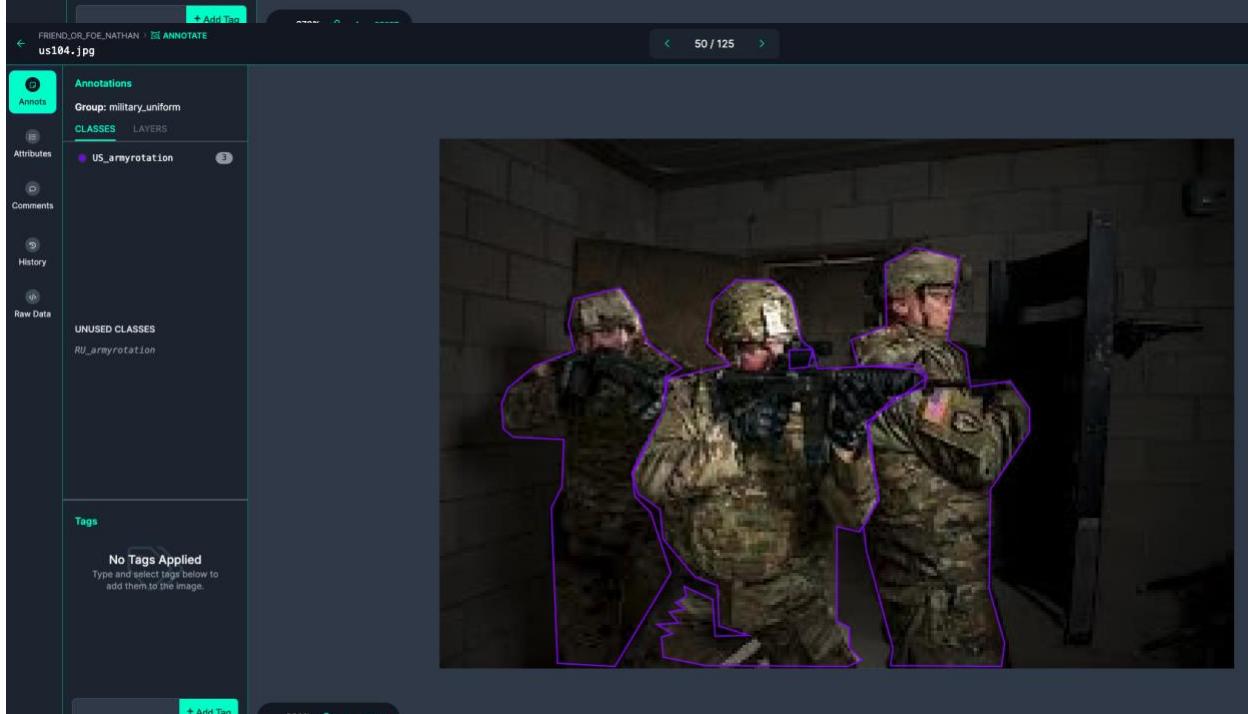

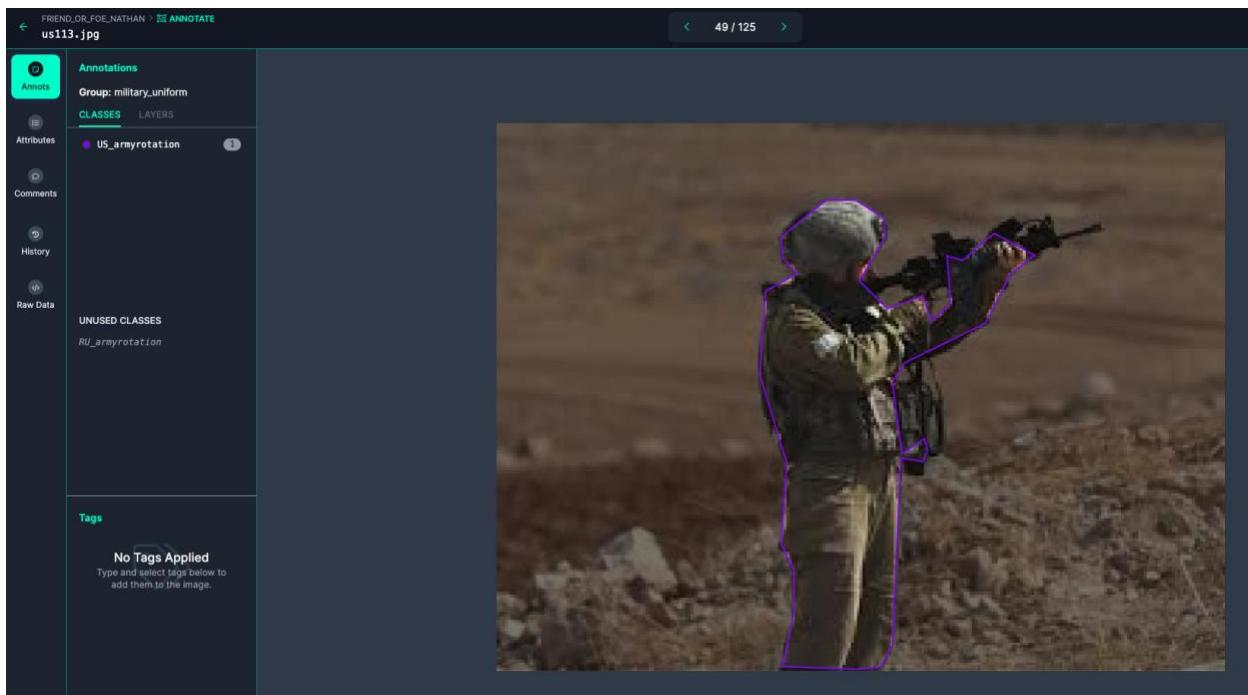

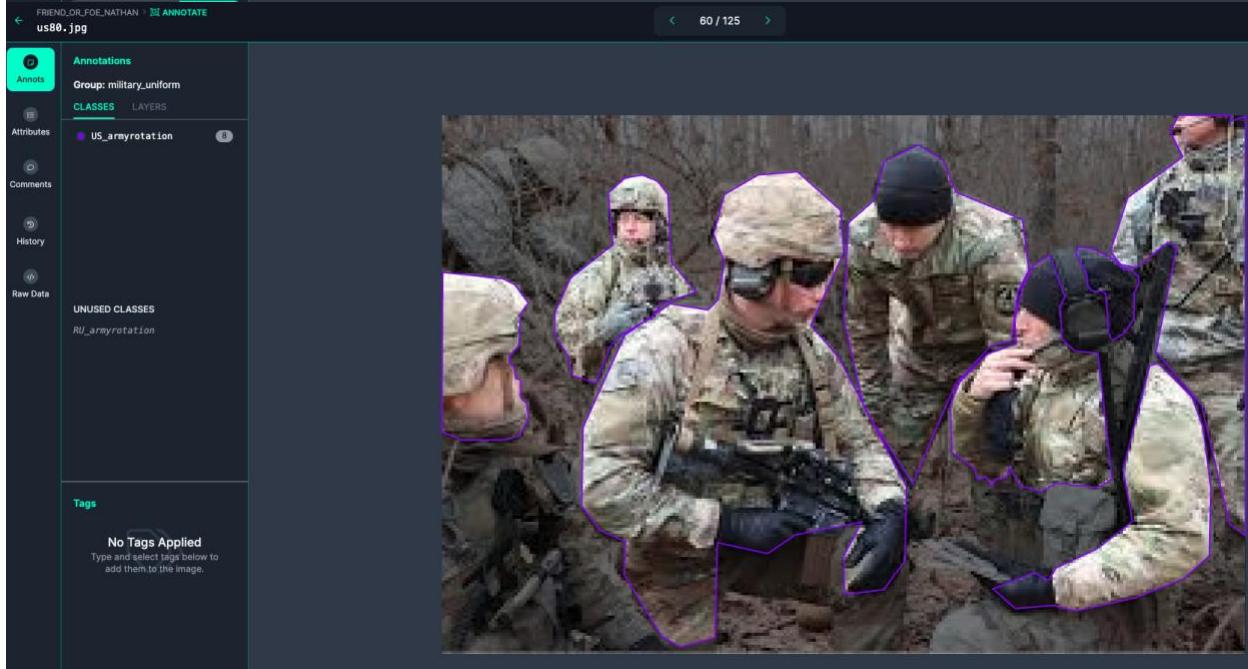

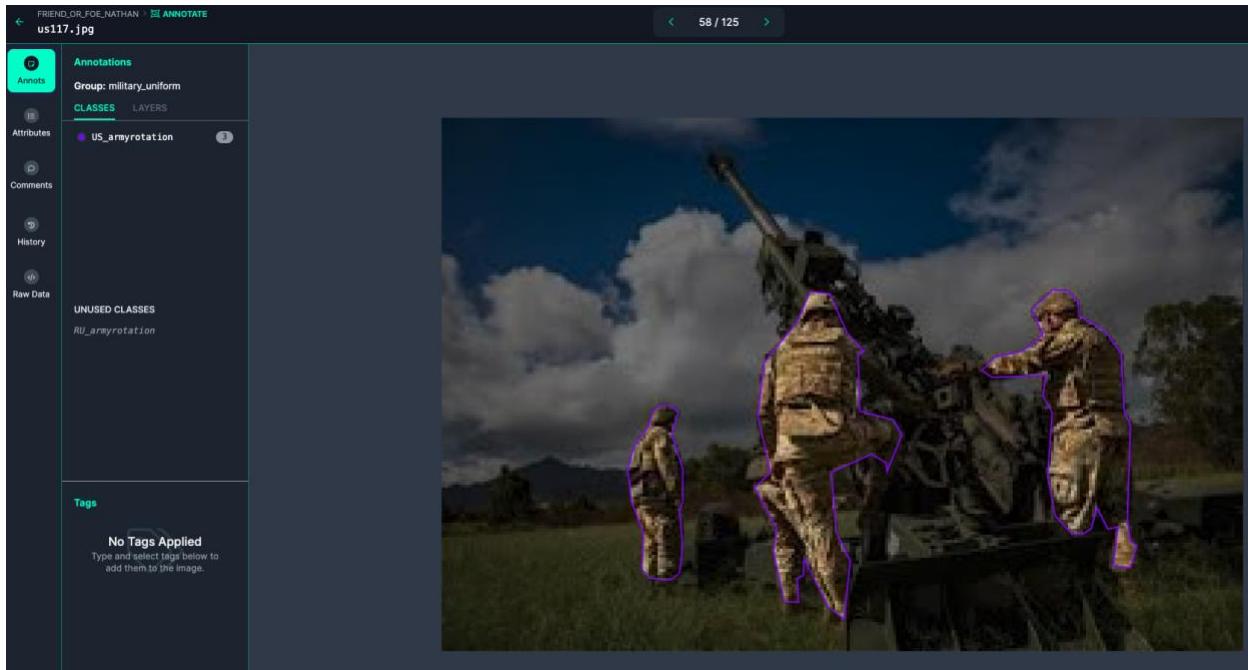

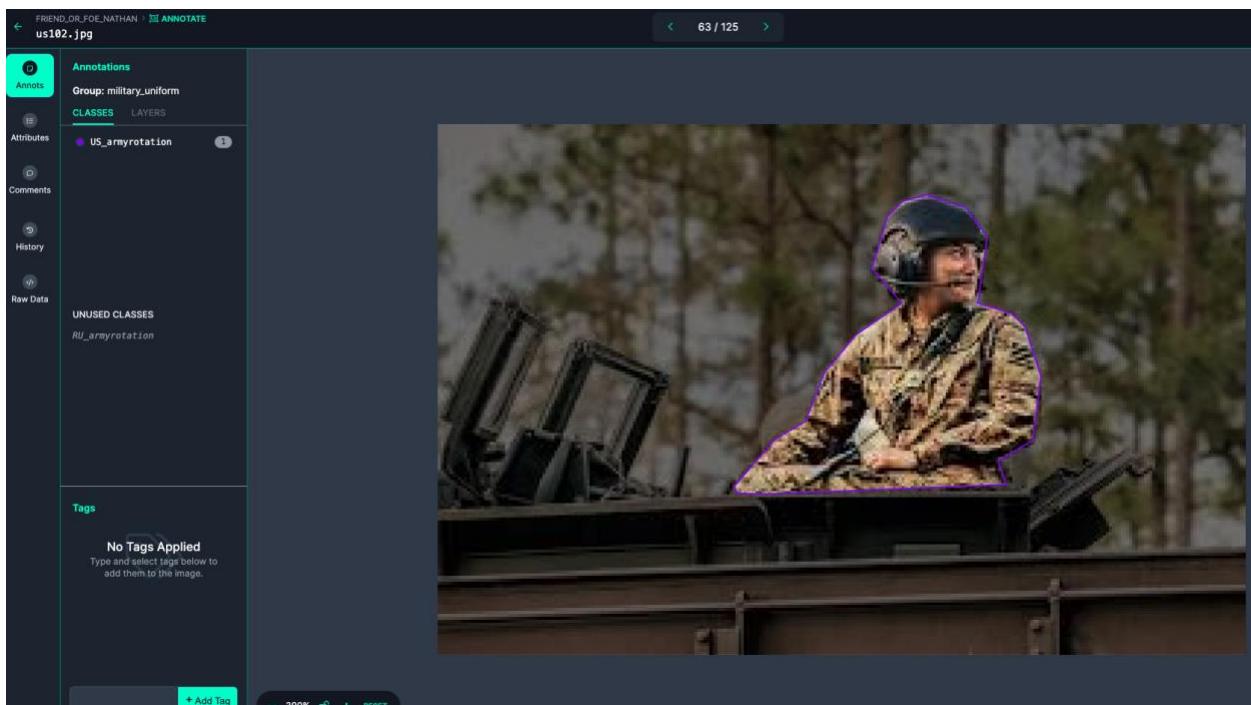

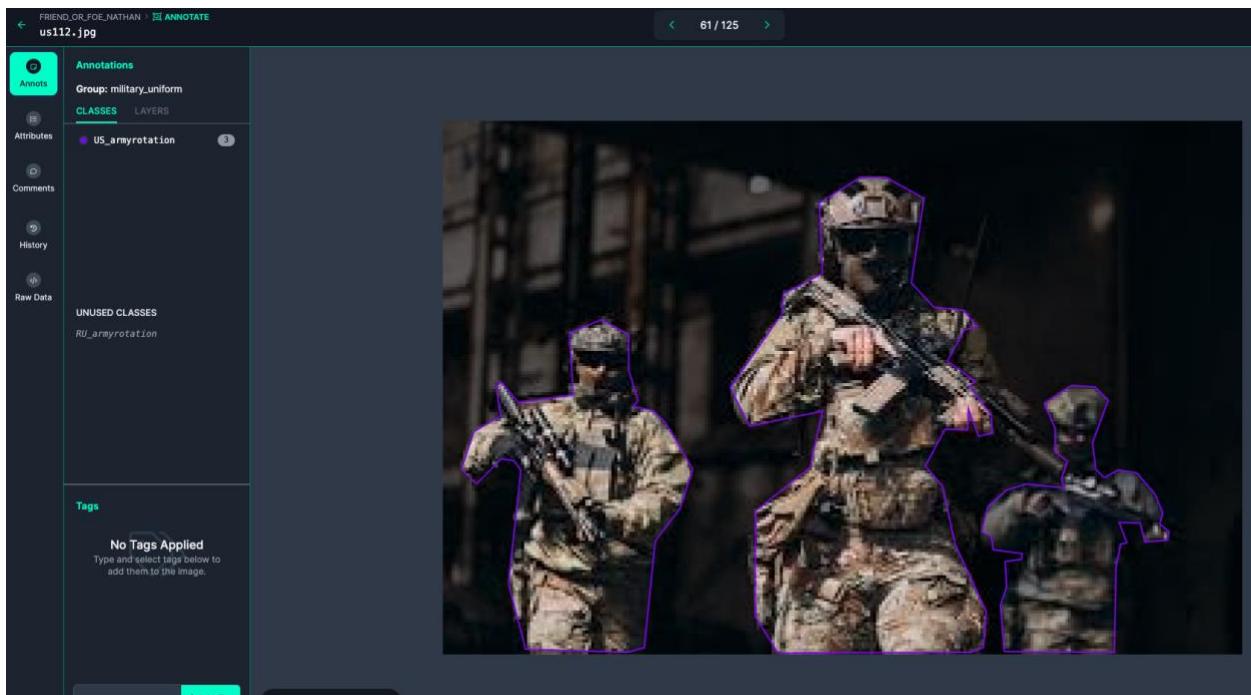

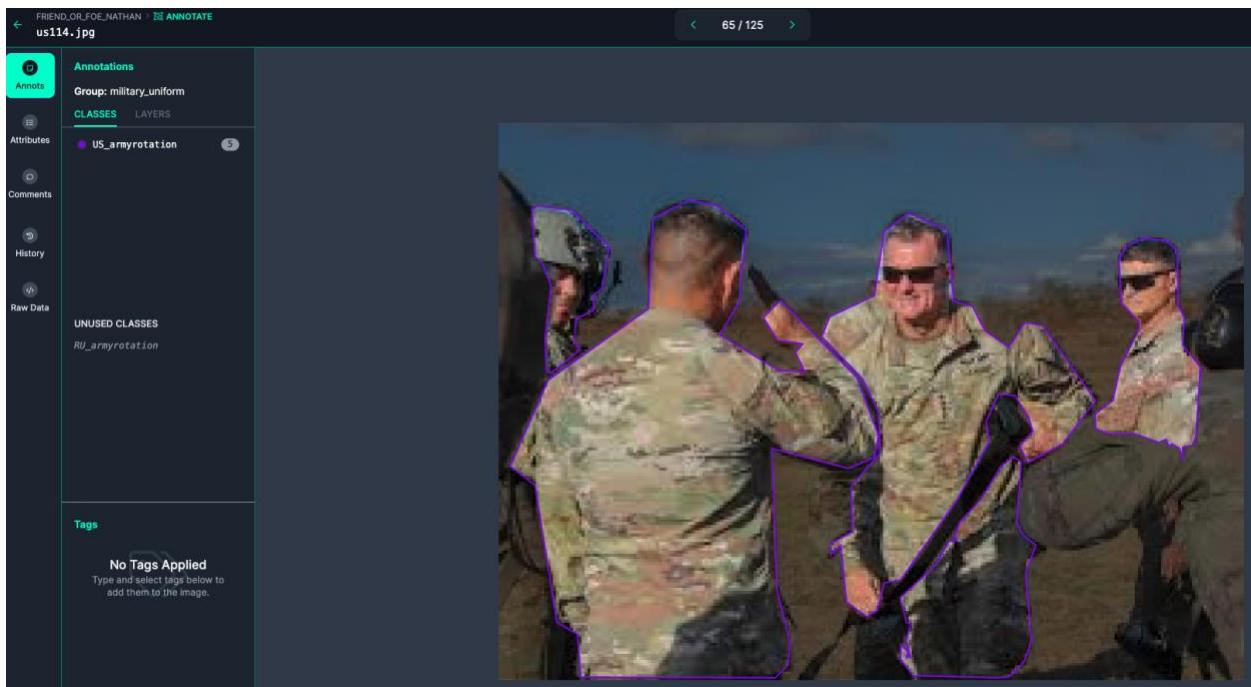

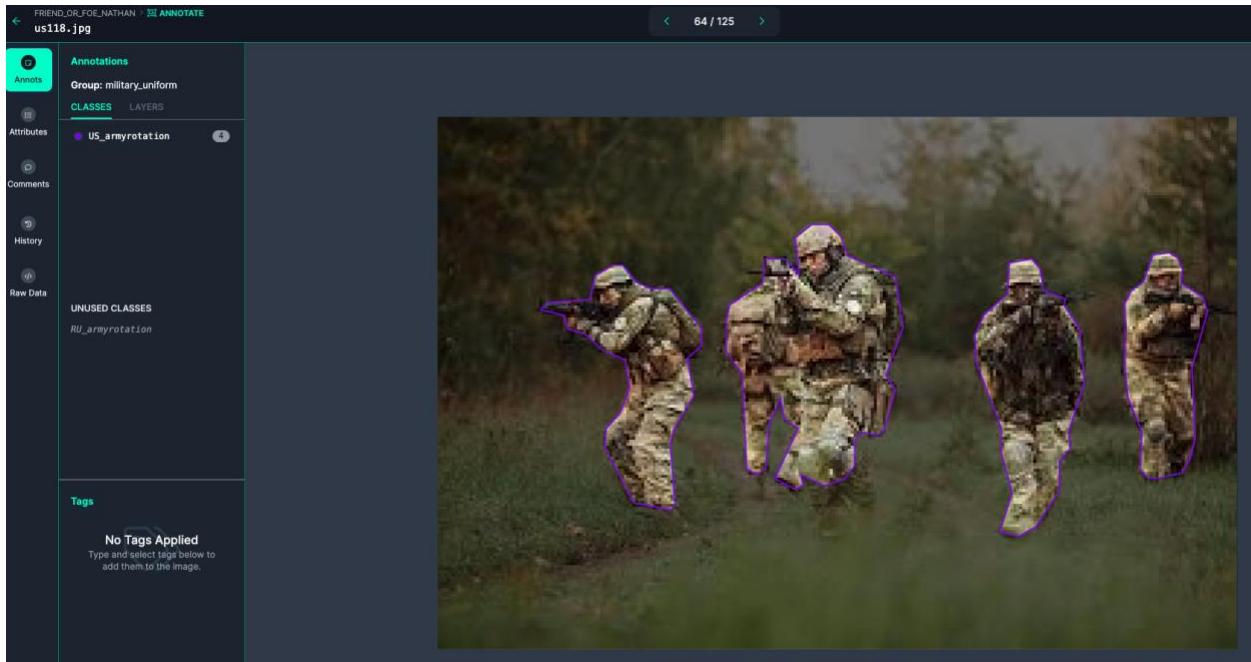

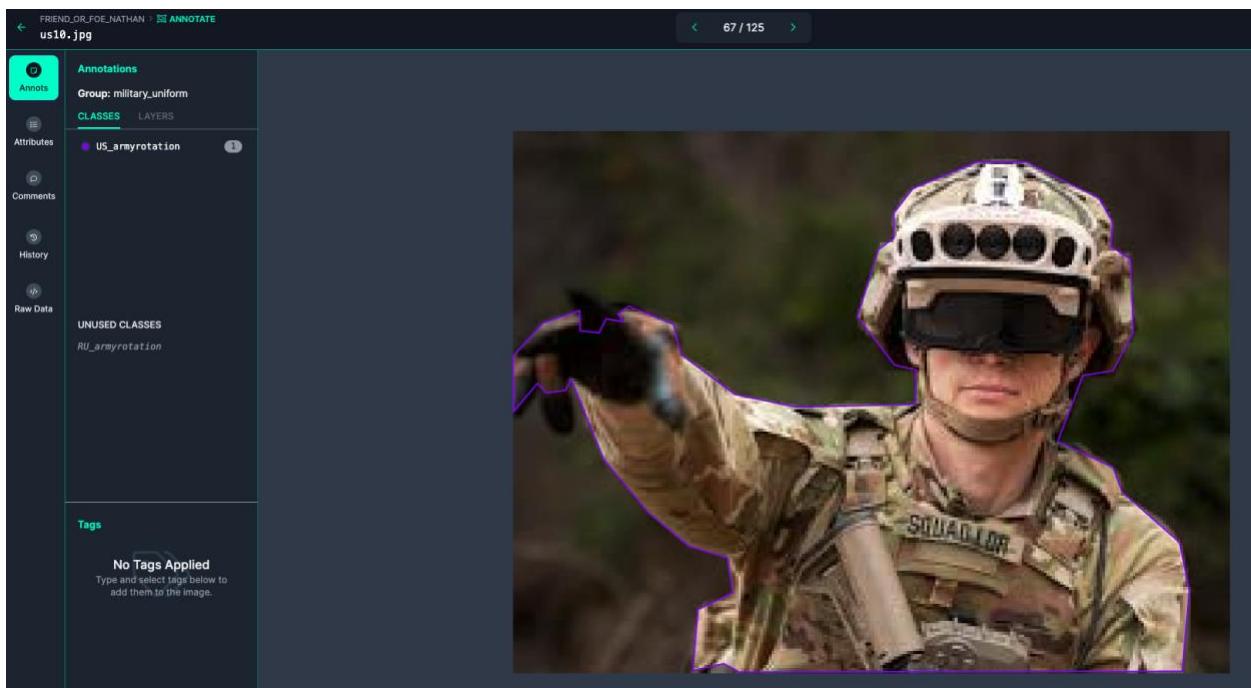

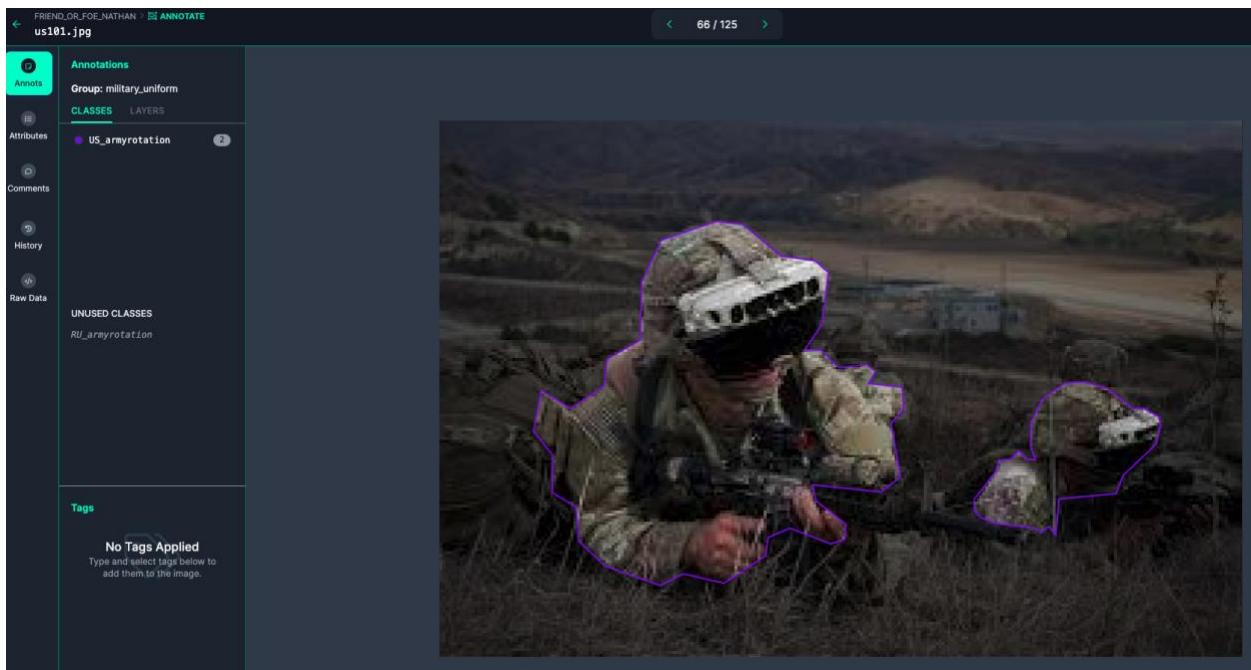

The screenshot shows a user interface for image annotation. At the top left, the path is displayed as FRIEND_OR_FOE_NATHAN > ANNOTATE us120.jpg. The top center shows the page number 55 / 125. On the left side, there is a sidebar with several tabs: Annotations (highlighted in green), Attributes, Comments, History, and Raw Data. Below these tabs, under Annotations, is a section titled "Group: military_uniform" with a "CLASSES" tab selected. Under "CLASSES", there is one entry: "US_armyrotation". Below this, under "UNUSED CLASSES", is the entry "RU_armyrotation". At the bottom of the sidebar is a "Tags" section with the message "No Tags Applied" and a note to "Type and select tags below to add them to the image". The main area of the interface displays a photograph of two soldiers in camouflage uniforms standing outdoors in a field. The soldier on the left is facing right, holding a rifle, while the soldier on the right is facing forward. Both soldiers have purple outlines around their bodies, indicating they have been selected or annotated.

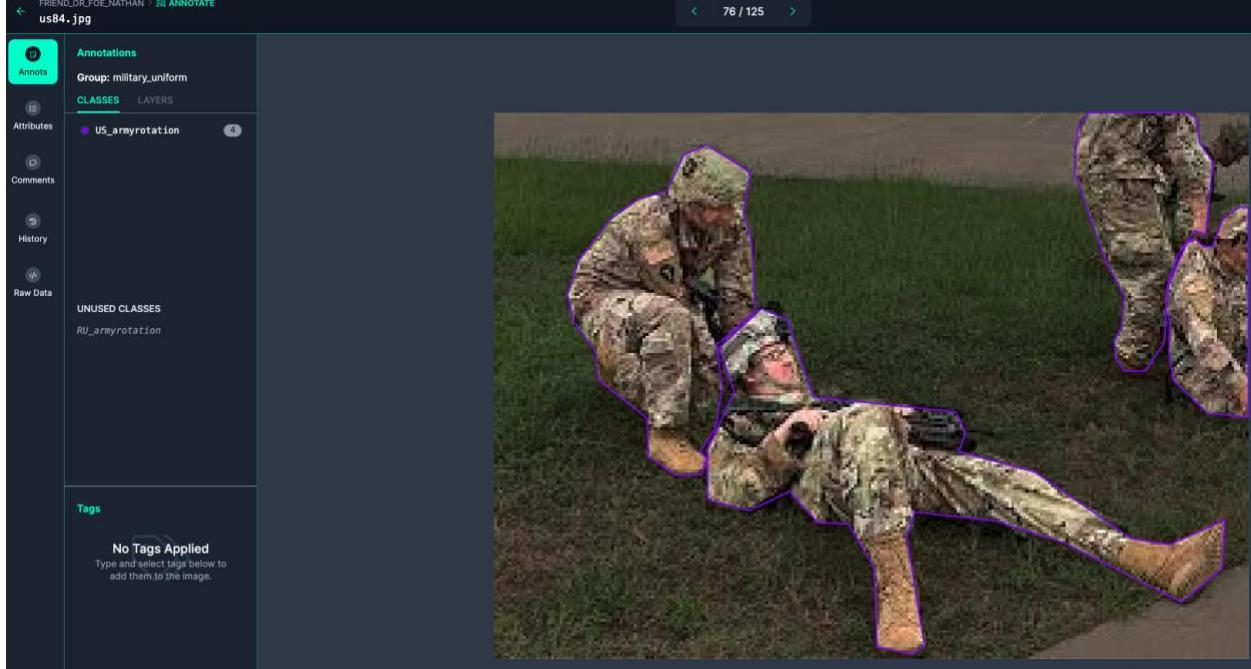

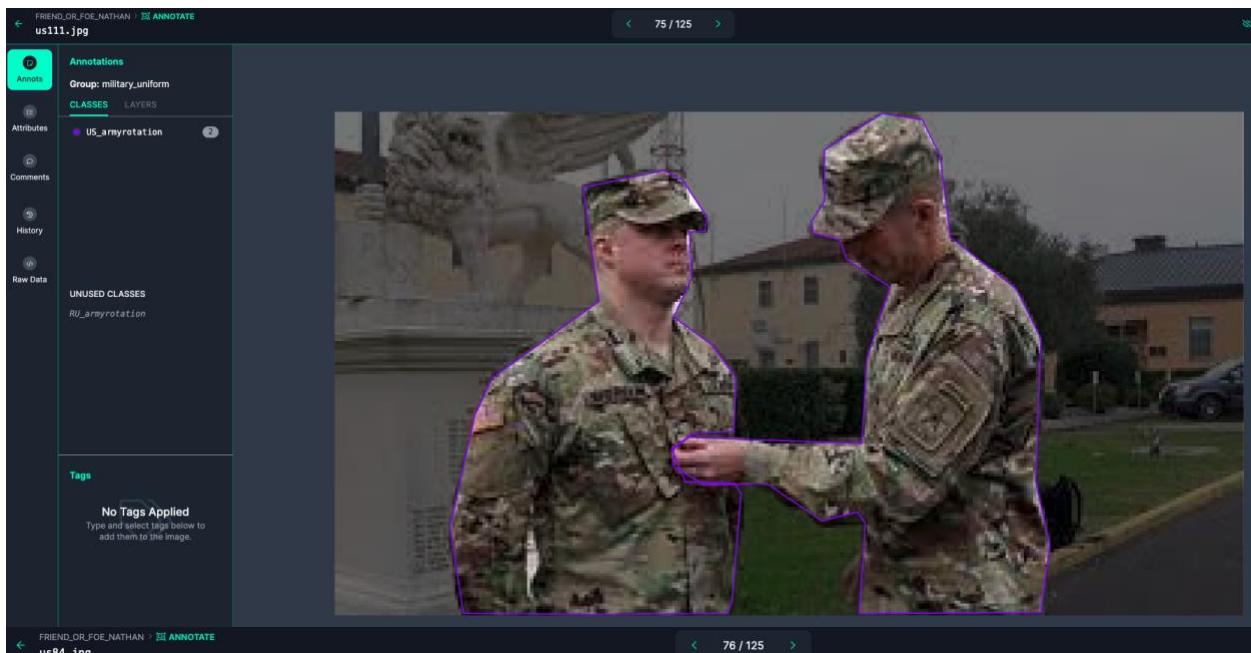

A screenshot of the Annotate application interface. The top navigation bar shows 'FRIEND_OR_FOE_NATHAN > ANNOTATE' and the file name 'us103.jpg'. The top right corner displays '57 / 125'. On the left side, there's a sidebar with icons for Annotations (selected), Attributes, Comments, History, and Raw Data. Below these are sections for 'Annotations' (Group: military_uniform, CLASSES: US_armyrotation), 'UNUSED CLASSES' (RU_armyrotation), and 'Tags' (No Tags Applied). The main area shows a photograph of a smiling soldier in camouflage uniform and cap, with a purple polygonal selection box around their head and shoulders. In the background, a military vehicle is visible.

The image consists of two vertically stacked screenshots of a digital annotation tool. Both screenshots show a dark interface with a sidebar on the left containing various metadata fields like 'Annotations', 'Attributes', 'Comments', 'History', and 'Raw Data'. The main area displays a photograph of military personnel. In the top screenshot, two soldiers in camouflage uniforms are shown; one is holding a smartphone. Both figures are highlighted with thick purple outlines. In the bottom screenshot, four soldiers in camouflage uniforms are shown in a field-like environment; three of them are highlighted with purple outlines. The top screenshot is labeled 'us98.jpg' and the bottom one is labeled 'us33.jpg'.

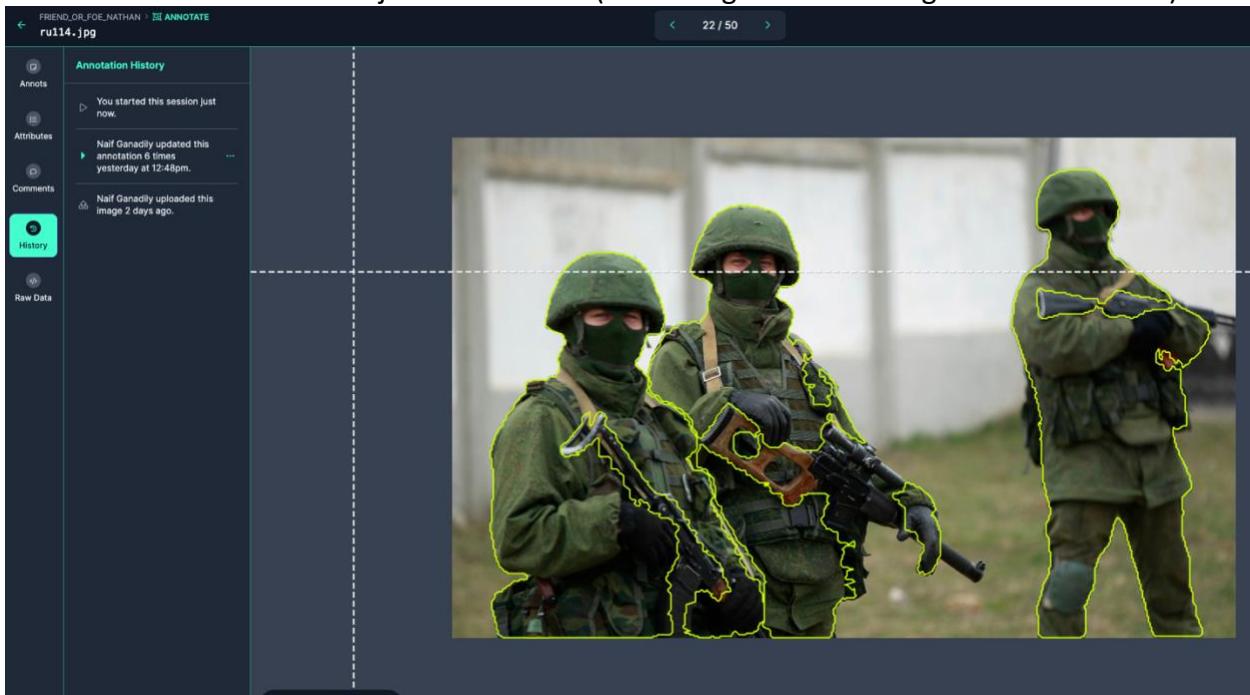

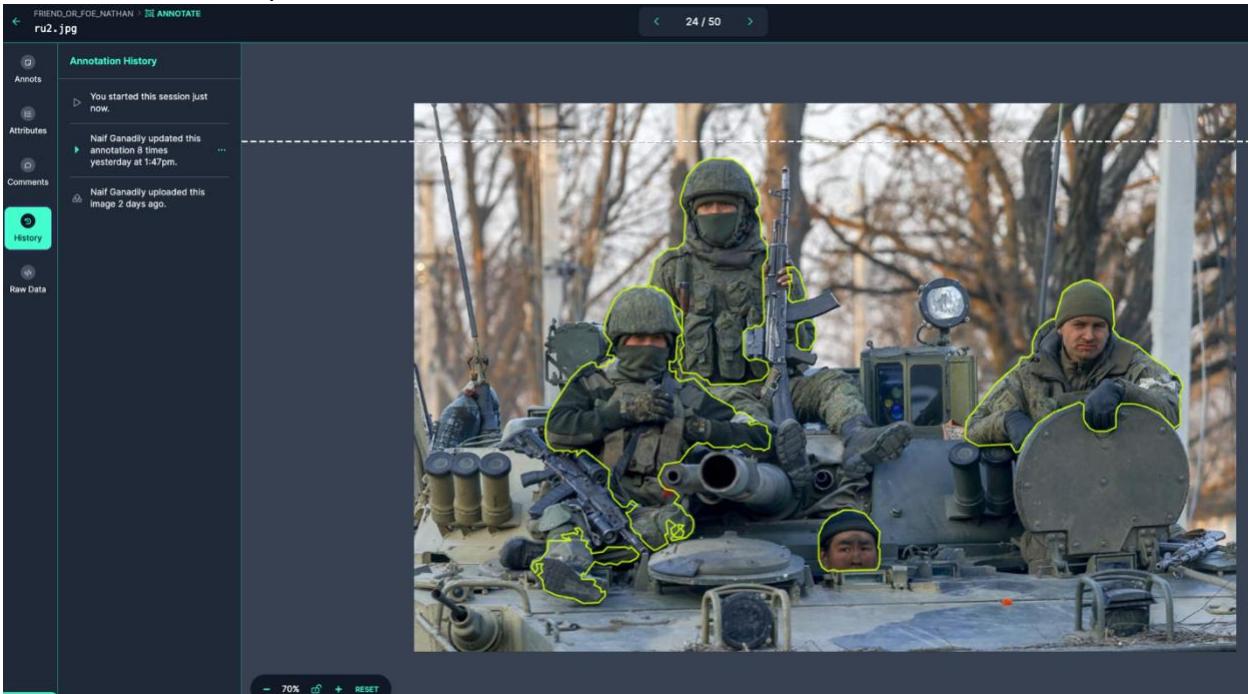

annotation

The soldier in the middle has a pouch pocket that should be included in the uniform but is excluded for some reason.

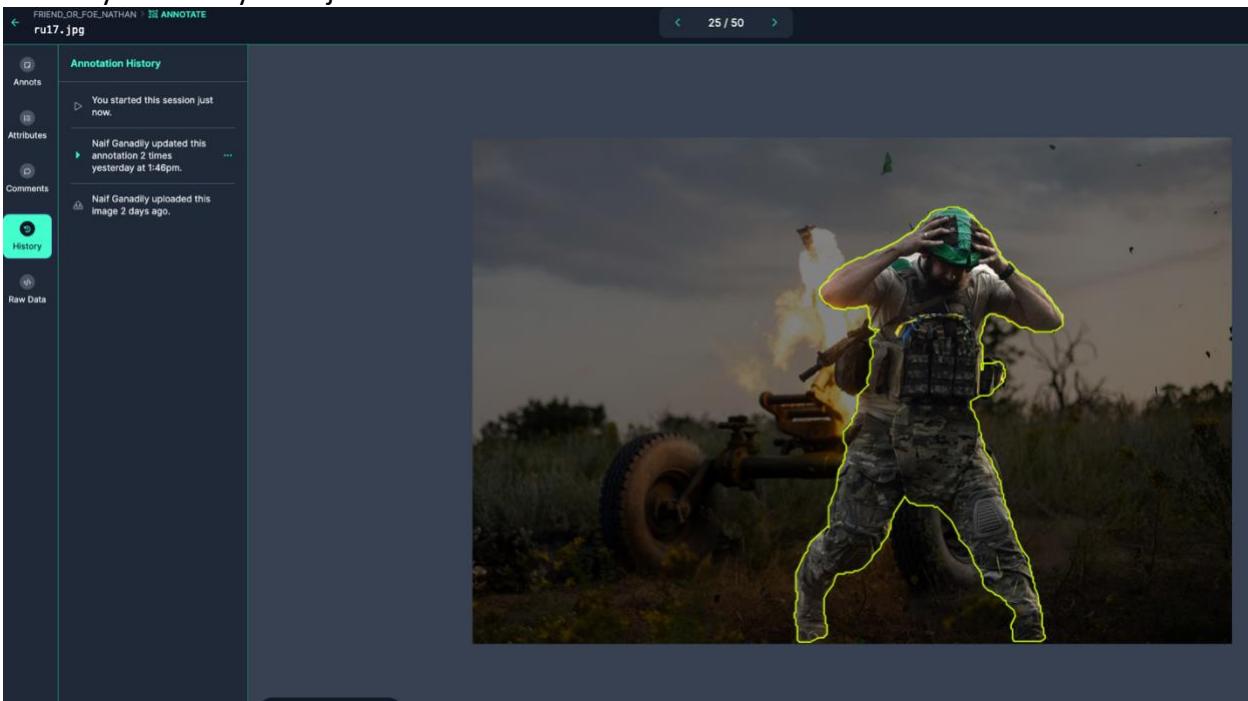

Also, I noticed that you've been omitting weapons from the uniform altogether (which is the right thing to do), but there are certain situations where including the weapon is actually the right thing to do. In this case, the weapon is splitting the middle soldier in half and causing you to make an extra annotation just for his hand (which might be confusing for the ML model).

Here's another example of "improper" segmentation where a soldier's foot and another soldier's head are separate annotations.

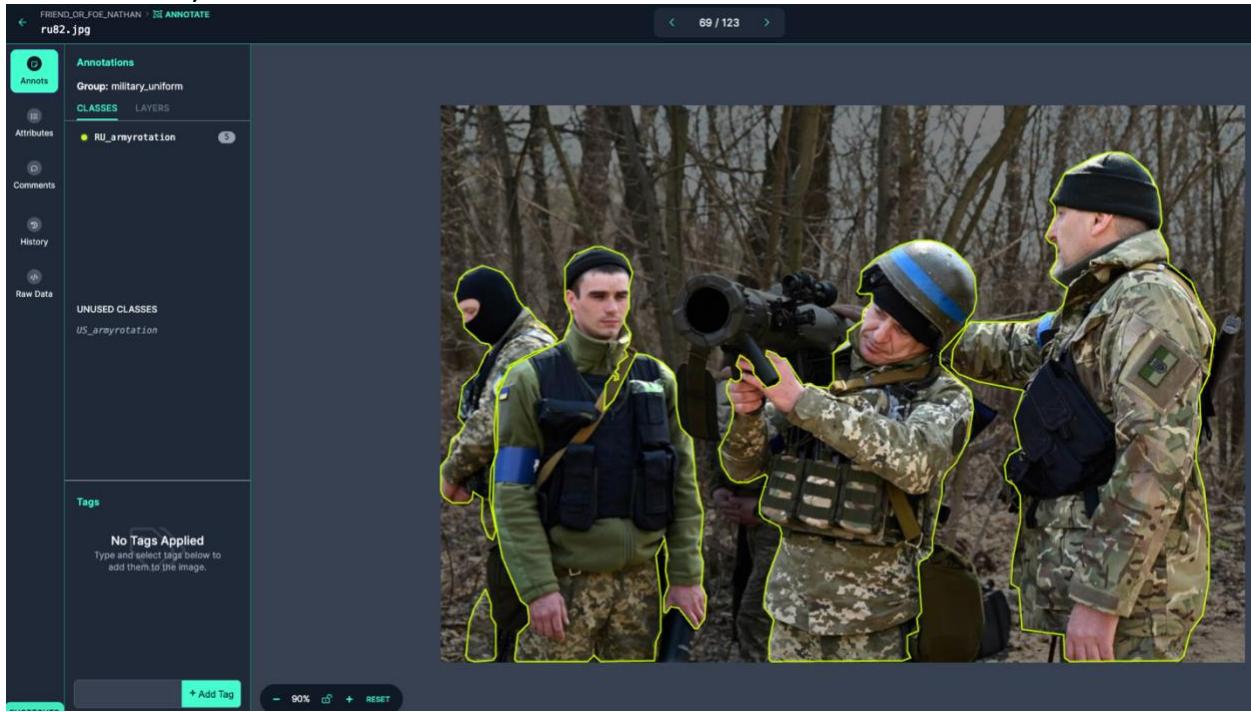

US Army? This may have just been an accident.

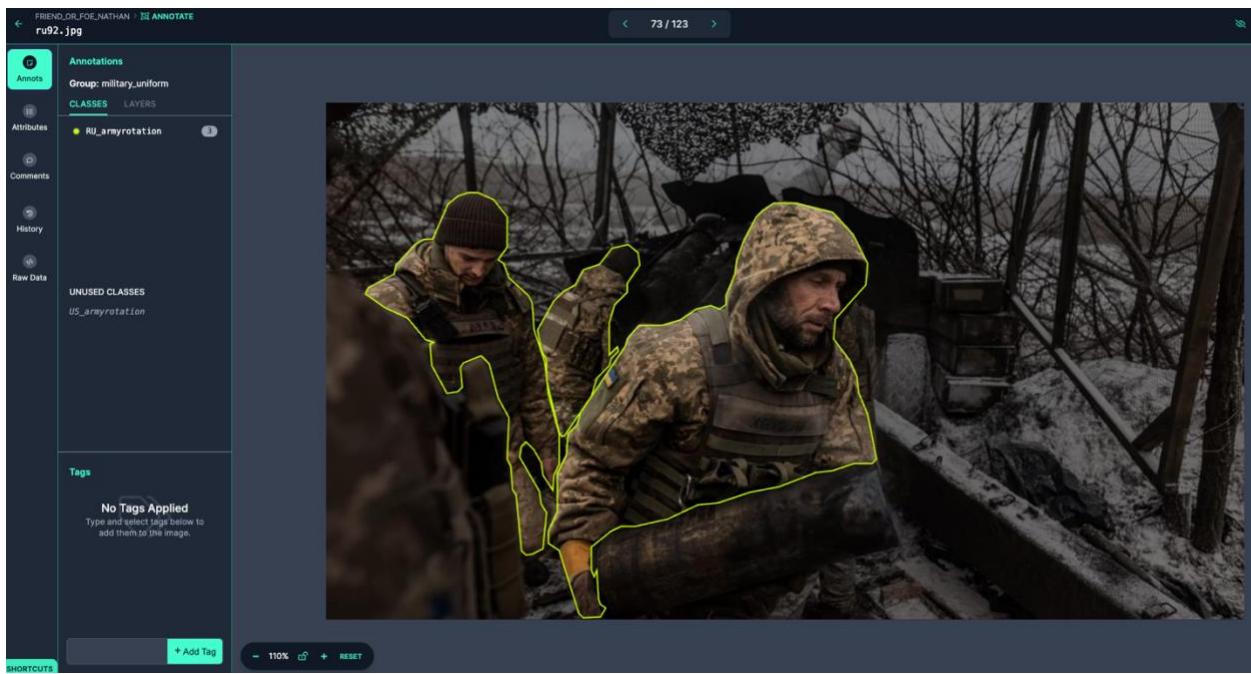

Missing label for the soldier in the bottom right

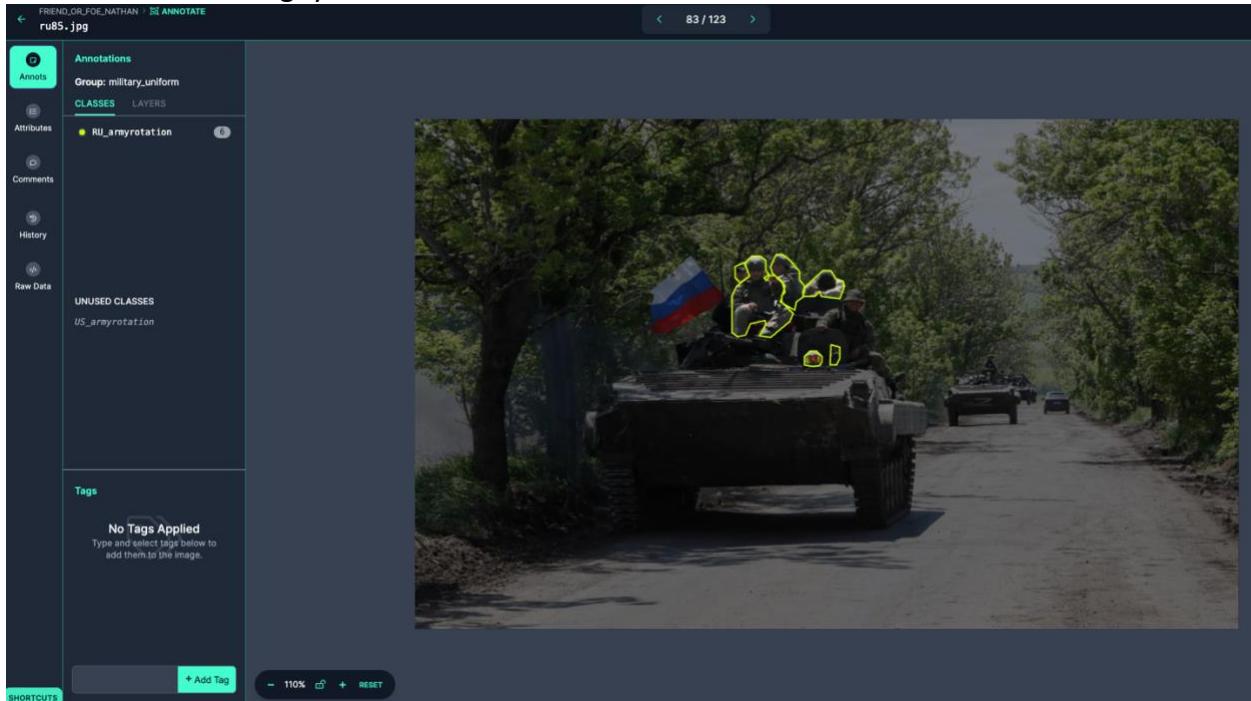

Ukrainian army I think

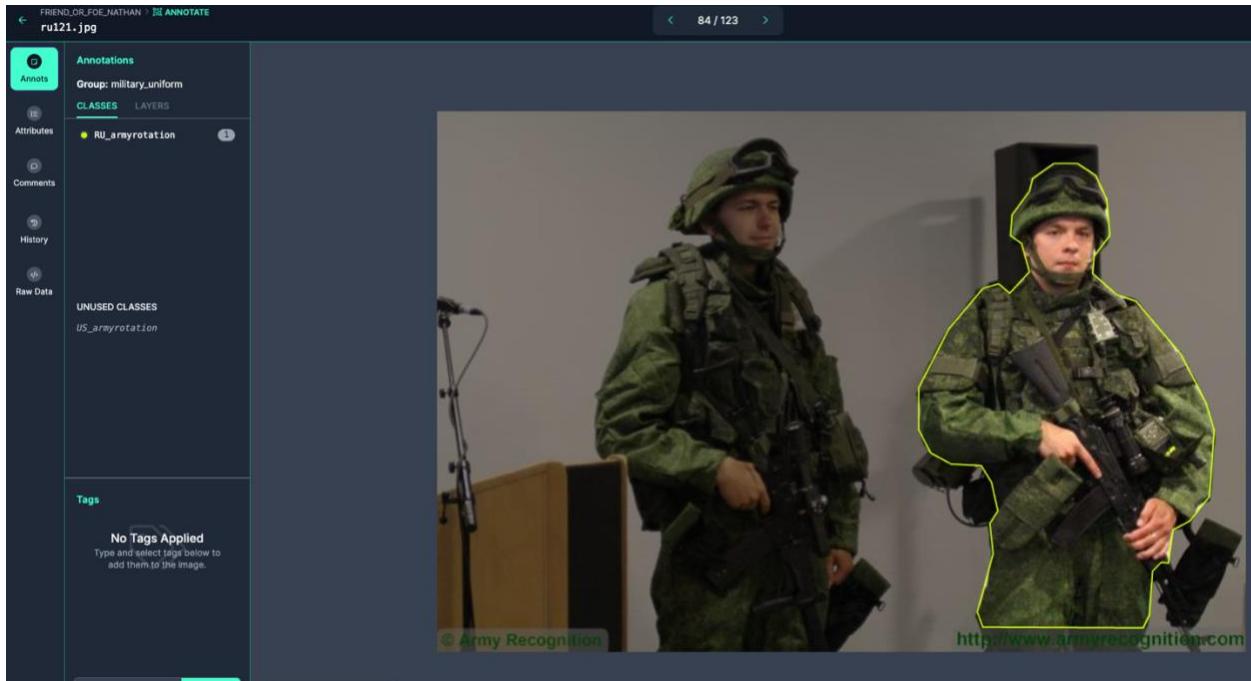

Ukrainian army

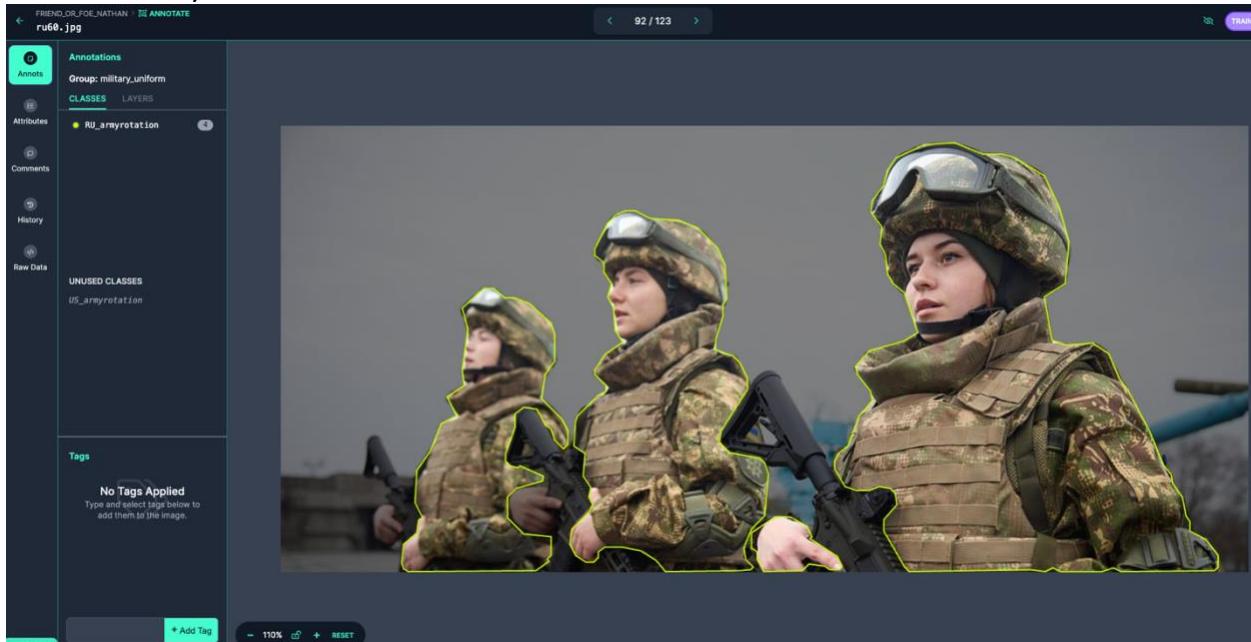

Small annotations of a barely visible soldier's head (and his piece sign) can be removed. Maybe we can annotate the guy behind the driver.

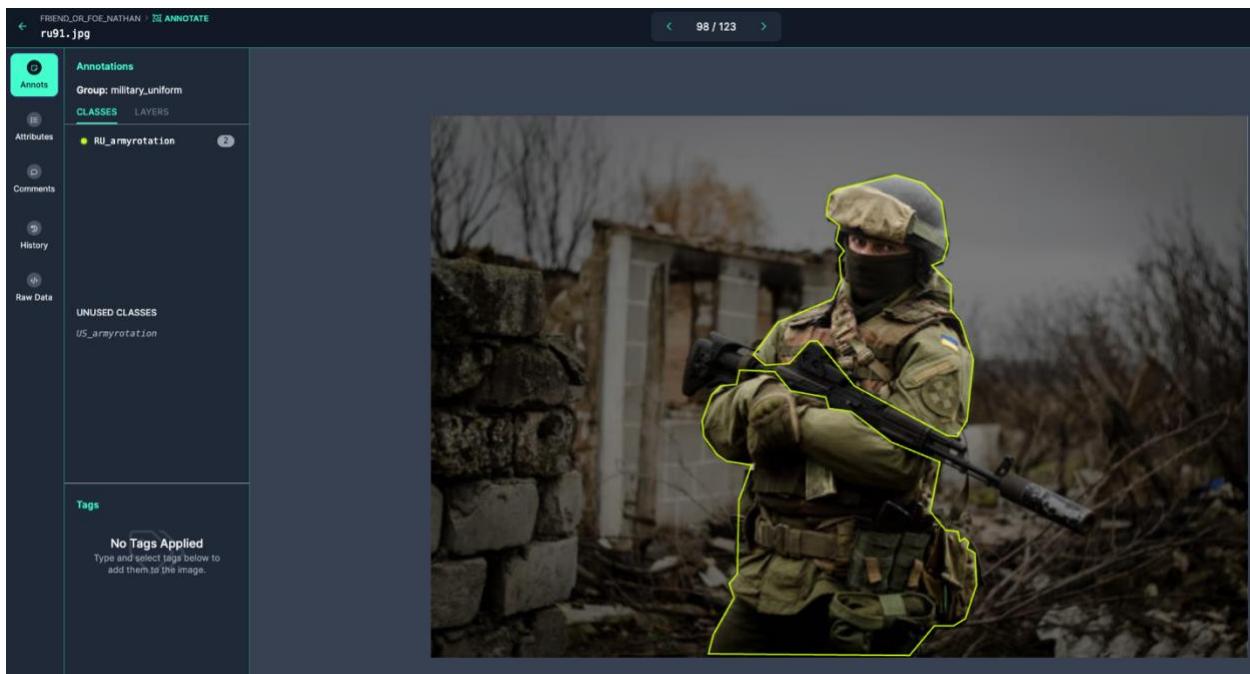

Left soldier not annotated.

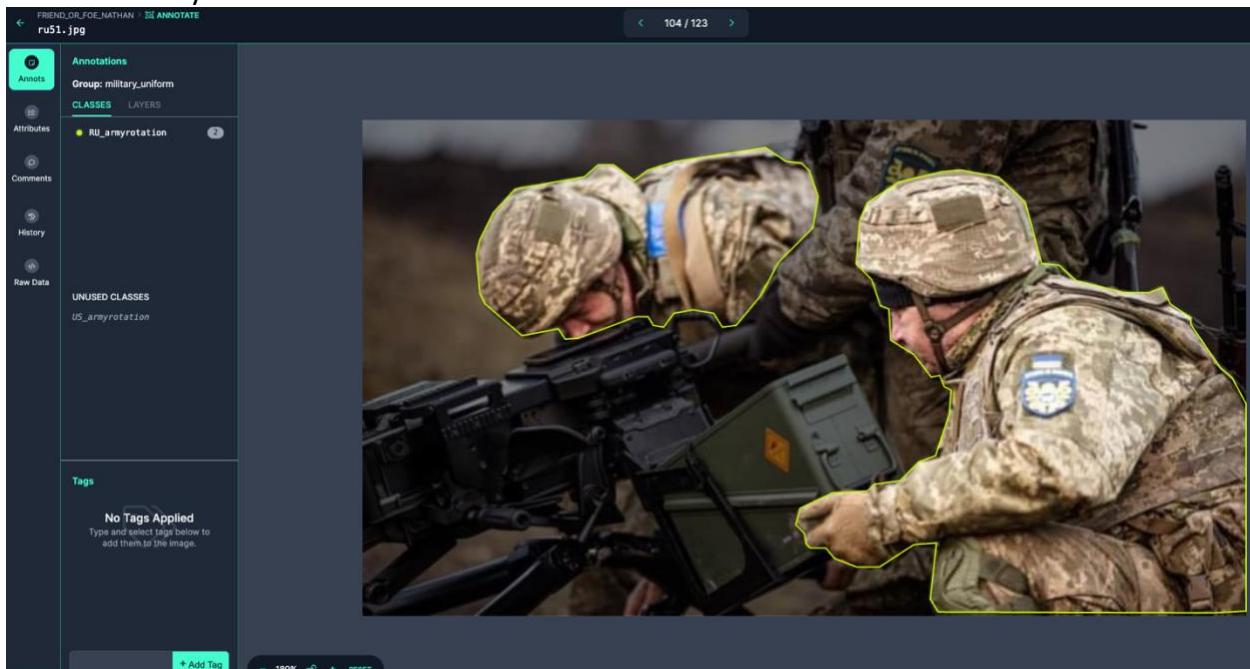

Ukrainian army

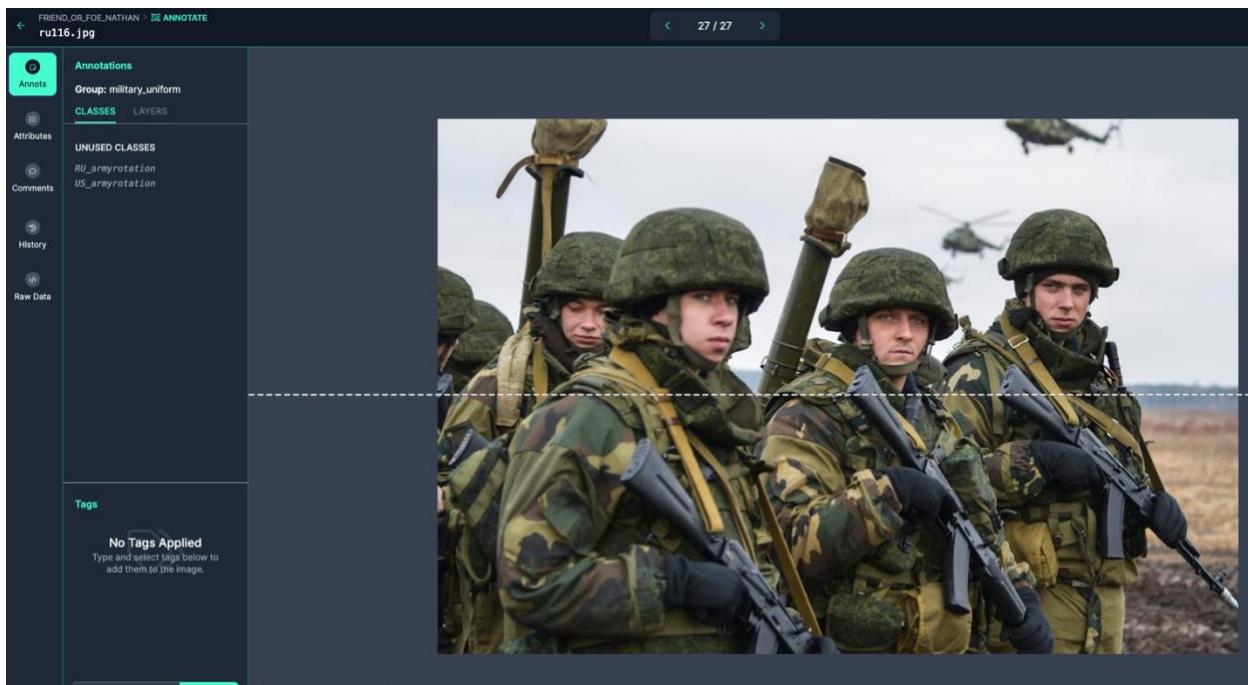

Ukrainian army

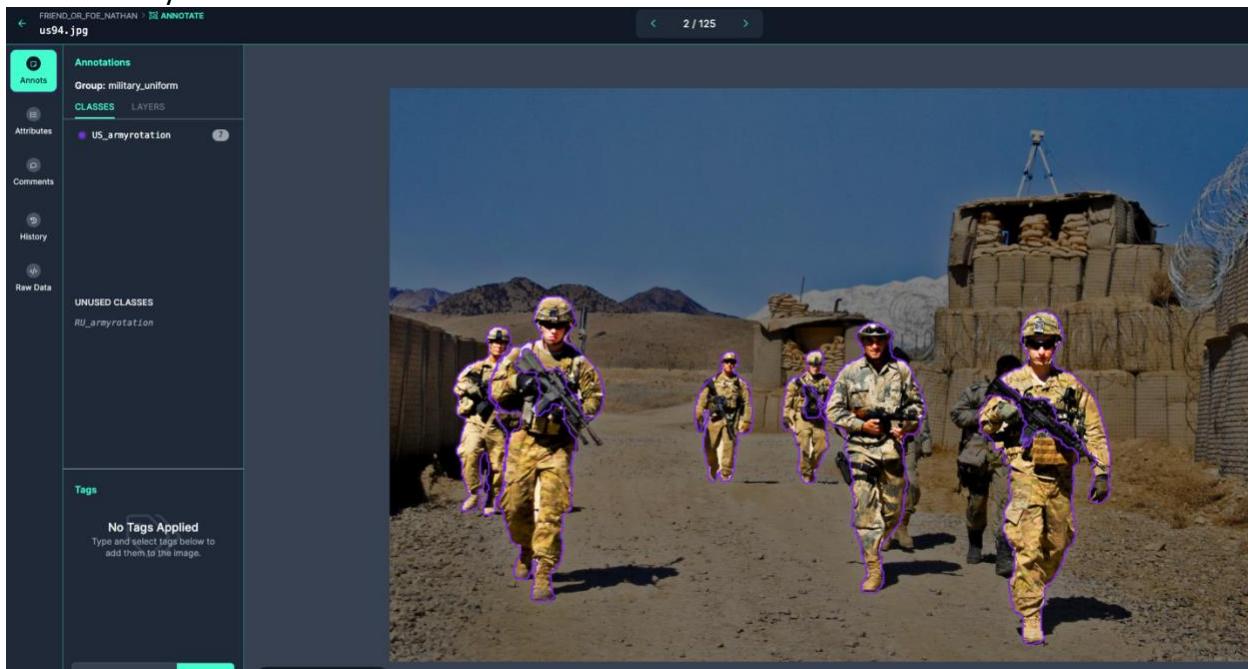

Ukrainian army

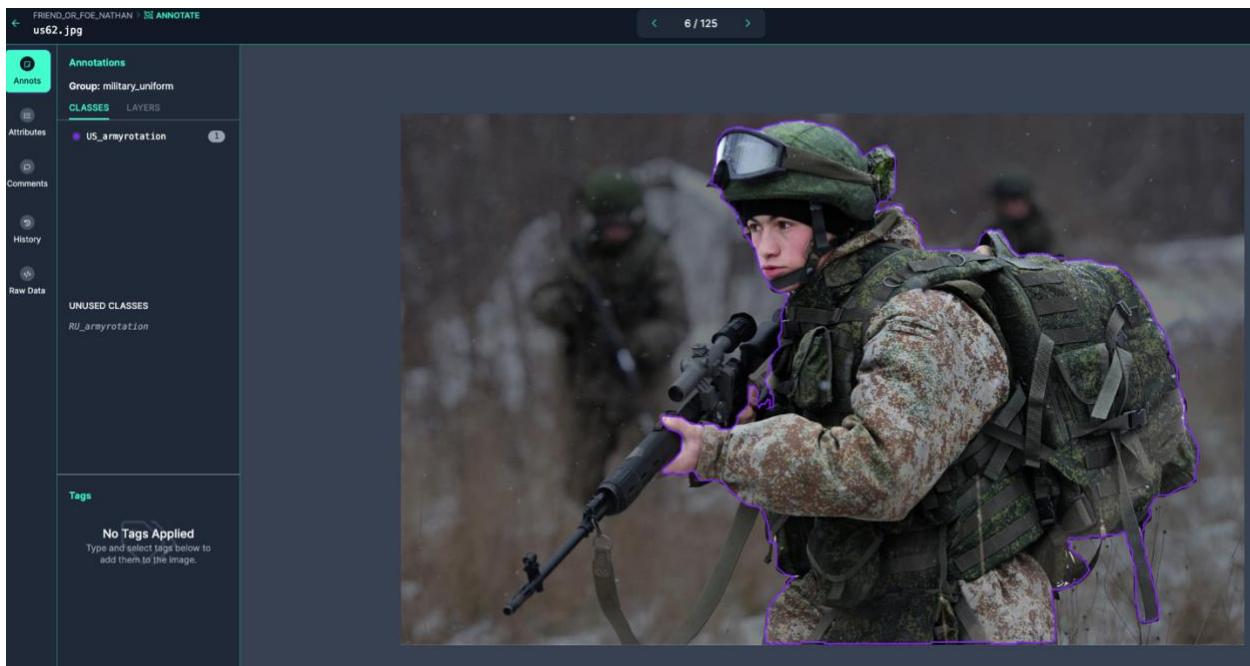

Not annotated as Russian Army

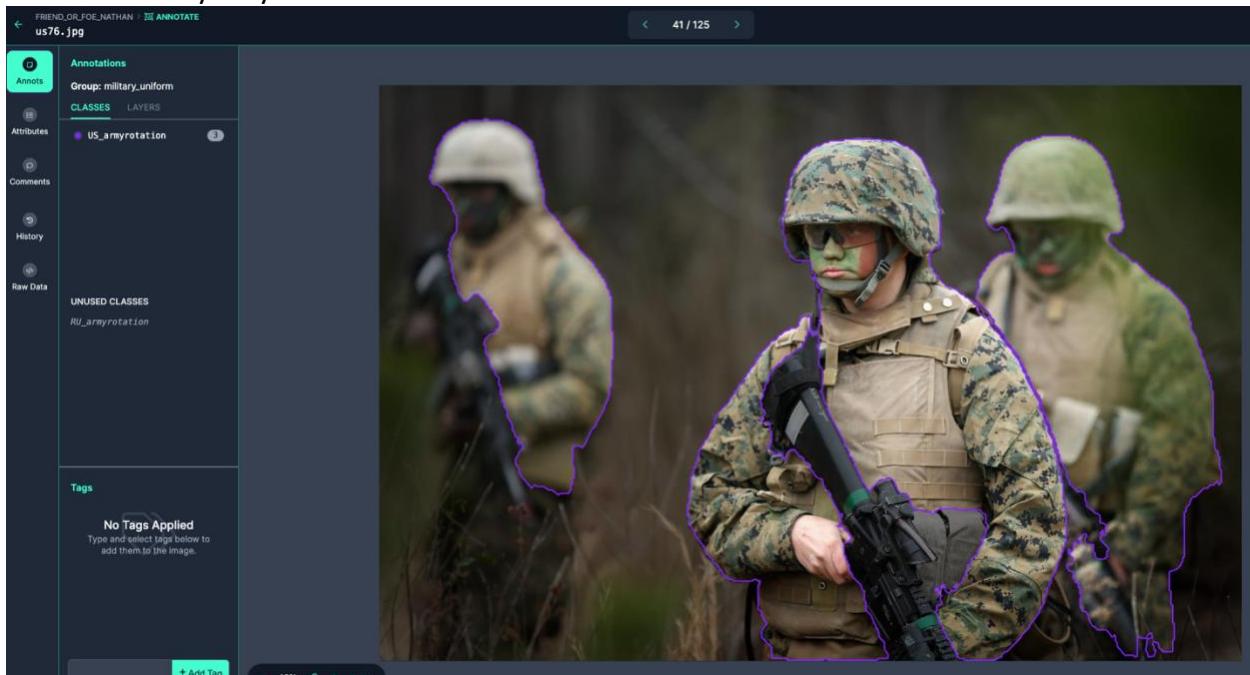

The second soldier from the right is not wearing an approved US military uniform. Not sure what military this is but it is not US.

Russian military annotated as US military.

Russian military maybe?

Soldier on the right is not annotated.
